- Engineering, Technology
- Geography, Geology
- Mathematics, Informatics
- Natural Sciences

Faculties involved

- Faculty of Sciences and Technology (Engineering, Technology, Geology, Mathematics, Informatics, Natural Sciences)
- Faculty of Pharmacy (Nutrition and Food Chemistry)
- Faculty of Humanities (Geography)

More than 42 Research Centres/ Groups

How to get in contact with the University of Coimbra staff for EADIC

Each Faculty has an Erasmus Coordinator per study field and he/she is the contact person for all EU projects and will put candidates in contact with the Faculty/ research centre that delivers the relevant PhD programmes/ research projects.

The contact persons for each mobility type are indicated at the Academic Opportunities file on the EADIC II website (<http://www.unibo.it/EADIC/Apply/opportunities.htm> > [Universidade de Coimbra - Portugal](#))

The University of Coimbra strongly advises 'sandwich' and post-doc, as well as academic staff candidates to undertake preliminary contacts and agreements with the relevant contact persons at the University of Coimbra. For any doubt, we suggest that candidates contact the International Relations Unit (rmaia@ci.uc.pt)

Full PhD, 'sandwich' PhD and Post-doc candidates shall start in September 2011. Academic staff may start either in February/March or September 2011 so that they can be involved in teaching activities.

Administrative staff candidates shall contact the International Relations Unit directly (rmaia@ci.uc.pt)
