Horizon 2020 Reflective 2: Emergence and transmission of

European cultural heritage and Europeanisation

- CULTURAL HERITAGE AND VALUES are at the heart of our capability of overcoming the current EU crisis which could well provide the stimulus for revising EU policies so as to provide a solid basis for the emergence of a truly European cultural heritage and for passing it to future generations. The challenge is to explore and show how critical reflections on the historical, cultural and normative roots of Europe's cultural and democratic practices and institutions contribute to an evolving European identity today

Project objectives

- CRITICALLY REVIEW AND THEORIZE KEY CONCEPTS such as 'European Heritages'..., 'European Identity' and 'Collective Memory' in relation to academic literature, museum and heritage practices (all WPs)
- UNDERSTAND THE REACH AND PURPOSES OF 'European Heritages'
- symbolic representations and performances construct ideas of place (...)tradition and belonging in Europe. Europe in a changing world: inclusive, innovative and reflective societies

Project objectives

- Analyse, through key examples (e.g. musics, food, histories, curricula) how heritage representations ‘travel’ between different institutional, social and personal spheres and how identities are negotiated and produced through this.
- Explore how and why relationships with and toward different attitudes to the past inform identity positions, social orderings and moral values in Europe (WP 3 WP 2 WP 5: research on World War 2, historical key moments in museums and official medias).

Projects results

- Research: 1 book series with a major international publisher
- Dissemination: events; festivals; films; CoHere critical archive

WP

WP1 Provides a critical foundation for COHERE as a whole

WP2 Focuses on the position of 'others' within or outwith European heritages and identities, attending particularly to the place and perception of the Islam and to legacies of colonialism

WP3 engages particularly with language, tourism, music and festivals within heritage contexts

WP4 explores the potential of existing and future digital technologies (web- and mobile based experimental tools to be used in museums)

WP5 explores how European identity is shaped in the classroom

Wp6 Food as heritage

Excellence

- Assessed to extent relevant to the topic
- Objectives (clear, measurable, realistic, achievable)
- Relation to the WP/topic
- Concept and approach
- Positioning
- Any linked national or international R&I
- Overall methodology
- Gender
- Ambition (advance beyond state of the art, innovation potential)

- ESMA
- UNAL

Project objectives

- **MAIN GOAL:** to implement activities aimed at investigating creative ways through which traumatic pasts can be preserved and transmitted in spaces of memory such as museums, former detention centres, camps and sites of commemoration
- **INTERMEDIATE OBJECTIVES:**
- comparative research on museums and memory sites related to traumatic heritage in Europe and Latin-America;
- identification of new tools and protocols to apply the findings of the research;
- networking and intersectoral/international transfer of knowledge.

Projects results and/or highlights

- New research strands in collaboration with architects, scholars in Cultural Heritage studies and museum curators
- New models and styles for exhibitions and events, in particular for the use of artistic languages as well as digital media.
- Involvement of civil society organisations for interactive workshops and communicative initiatives in processes of reconciliation

Project objectives

- The general project *Herméneutique des Lumières* is a multidisciplinary project in literature, philosophy, history and art history organized in 4 unities: *Editer les Lumières*; *Lire les Lumières*; *Interpréter les Lumières*; *Ecouter Les Lumières*.
- The general project objectives are:
- identifying theories and the hermeneutic practices of the Enlightenment;
- understanding the discourse of Modernity from the comprehension that the Enlightenment had of itself;
- engaging in a multidisciplinary inquiry, ranging from philosophy to literature, from history to art history and to musicology.

Projects results and/or highlights

- The project aims at enhancing the research of young people through the funding of post-doc scholarships and the recruitment of PhD students.
- The 4 groups pursue the research through the establishment of permanent seminars, the organization of summer schools and local and general conferences, creating an international studies network on the Enlightenment and consolidating long-lasting relationships with excellent universities and scholars.
- The results are presented and discussed in important universities and published in monographs, papers in scientific reviews and conference proceedings.

New calls in Horizon 2020

- The project *Herméneutique des Lumières* was born as a three-year project (2014-2017) funded by FNS/Sinergia. For the results obtained so far, the project has been funded for an additional year until October 2018.
- For the future, the plan is to transform the project into an institutionalized research group attached to the Universities of Geneva, Bologna and Besançon. The group will welcome researchers of national and international scale to continue the joint reflection and organize our research.
