MY COLLABORATION NETWORK

During my time as a researcher, I have developed an extensive and well-connected global research network in over 15 countries (pictured below). This network supports and enriches my current interdisciplinary research program. Each color outlined node is the title of a project, workshop or collaboration I have been involved in, and names listed are the main collaborators involved in these projects. Colors are associated with the main overarching research questions that have driven my research so far, listed at the bottom.
