RESEARCH INTERESTS

Dr Fabio Pierazzi is a **Lecturer (Assistant Professor) in Cybersecurity** at King's College London (KCL), where he is also **Deputy Head of the Cybersecurity group** (since Sep 2022), and **Programme Leader of the MSc in Cyber Security** (since Fall 2020) to ensure its quality and relevance. He closely collaborates with the Systems Security Research Lab (S2Lab) at UCL. He has a strong track record of AI & security publications in peer-reviewed venues, including top journals and top conferences in the field (e.g., USENIX Security, IEEE S&P, IEEE TIFS, IEEE TDSC), and also serves in Program Committees of well-known venues including IEEE S&P (Oakland), USENIX Security, ACM CCS, AAAI, IJCAI, ICML, ICLR, DLS, AISec, DIMVA, and ARES, plus served as journal reviewer in multiple occasions for IEEE TIFS and ACM TOPS among others. He has worked on cybersecurity since 2011, when he started his MSc thesis in applied cryptography for cloud database security. During his Ph.D. (2014–2017), he then focused on statistical methods for the detection of advanced attackers in large networks. Fabio's research interests now focus on behavioral modeling for anomaly detection, with particular emphasis on: machine learning for systems security (mostly malware analysis and network intrusion detection), adversarial machine learning, and adaptive attackers in highly non-stationary contexts. Moreover, Fabio has delivered many teaching and mentoring activities in security in different countries (mostly UK and Italy), and has taken the leadership in the application for NCSC Certification of KCL's MSc in Cyber Security, which in Spring 2021 resulted in a successful outcome.
