Summary of CV

This section describes briefly a summary of your career in science, academic and research; the main scientific and technological achievements and goals in your line of research in the medium -and long- term. It also includes other important aspects or peculiarities.

Associate professor in the Department of Arts and Humanities at the Universitat Oberta de Catalunya and co-head of the Historical Demography area at the Center for Demographic Studies – Autonomous University of Barcelona. Up to august 2020 I was adjunct professor at the Department of Economic History of the University of Barcelona. Along my career, I have been visiting researcher funded on competitive-basis at the Cambridge Group for the History of Population and Social Structure (UK), the Centre for Population Studies (Sweden), the Inter-University Consortium for Political and Social Research (USA) and the Centre for Economic Demography (Sweden). My research lines deal with: 1) Relevance of public health policies during Demographic Transition (19th-20th centuries); 2) The epidemic dynamics along Epidemiological Transition (19th-20th centuries); 3) Time reduction in database construction through Artificial Intelligence using Computer Vision methods; 4) Evolution of migratory flows (15th-19th centuries); 5) Intergenerational transmission of social status, intermarriage and kinship marriages within the social reproduction process (15th – 20th centuries) and 6) Economic inequality estimation and labour market formation from a gender perspective within preindustrial and industrial periods. These researches bore fruit in 32 articles in flagship national and international peer-reviewed journals, 4 books; 24 book chapters; 112 papers presented at national and international conferences. I was invited to address 28 seminars and to deliver 1 key lecture. Moreover, I have published 2 book chapters on teaching innovation. Additionally, I have co-organize 11 workshops, 5 conferences and 3 summer schools.

I have been principal investigator of 7 R&D&I projects and research coordinator of 2 projects, one of them an Advanced Grant funded by the European Research Council. Currently, I am the Principal Investigator of the project “Epidemics, State and Socioeconomic inequalities: Predictability and Durability (EPI-UNEQUAL)” funded by the Spanish Ministry of Science. It pursues to innovate and deepen on the predictability of historical epidemics, applying machine learning - AI and natural language processing to massive heterogeneous data such as textual information provided by official newspapers and historical daily press for the nineteenth and twentieth centuries for the whole of Spain. Moreover, it seeks to evaluate the persistence of the effects of epidemics in the short, medium and long term in terms of socioeconomic inequality, encompassing inequalities in health and demographic behaviour from a gender perspective. I also directed the project “Preventing past epidemics to cure present epidemics: Exploring Natural Language Processing and Bayesian statistics for building predictive models of epidemic expansion (EPI-PREDICT)”, funded by the BBVA Foundation. Moreover, I participate in an international project on examining the historical epidemiology profiles of port cities. In 2020 I was nominated leader of the research line ‘Sources, limits and constraints’ of the cost action ‘Women on the move’ funded into the EU-funded programme of European Cooperation in Science and Technology. I have participated in 14 projects and belong to 6 international networks. In addition, in these projects I did organize (recruit), creates, led and managed different research groups, most of them interdisciplinary groups. Likewise, within these projects it has been possible to generate 15 full positions as PhD students, Data Scientists and Postdoc researchers.

I have supervised 8 doctoral theses (4 still ongoing) within the Demography programme organised by the Geography Department of the Autonomous University of Barcelona and the Center for Demographic Studies, and History Department of the University of Barcelona. Besides, I have mentored 4 master's dissertations in the Master's Degree in Territorial Studies and Population in the Autonomous University of Barcelona, 3 within the framework of the European Doctoral School of Demography (EDSD), and an end-of-degree at the Computer Science Department of the Autonomous University of Barcelona.

In 2014 I was elected as permanent convenor of Family and Demography network of the European Social Science History Conference and president of the Spanish and Portuguese Association of Historical Demography in 2023. I have been rewarded with 4 scientific awards. Last year I received the Louis Henry Award by the European Society of Historical Demography on recognizing methodological innovations in data collection, visualization or analysis of demographic data. Finally, in 2022 I was appointed as co-editor of the Historical Life Course Studies journal.

General quality indicators of scientific research

This section describes briefly the main quality indicators of scientific production (periods of research activity, experience in supervising doctoral theses, total citations, articles in journals of the first quartile, H index...). It also includes other important aspects or peculiarities.

Supervision of Doctoral Theses

- 4 doctoral theses (defended) at the Geography Department of the Universidad Autónoma de Barcelona.
- 4 doctoral theses ongoing, 3 at the Geography Department of the Universidad Autónoma de Barcelona and 1 at History Department of Universidad de Barcelona.

Supervision of Master's Theses

- 8 master's theses, 4 in the Master in Regional and Populations Studies (Geography Department, Universidad Autónoma de Barcelona) and 3 of them in the European Doctoral School of Demography.

Supervision of end-of-degree project

- 1 end-of-degree project at the Computer Science Department of the Universidad Autónoma de Barcelona.

PhD Committees

- 7 nominations.

Publications

- 34 articles in flagship national and international peer-reviewed journals
- 4 books.
- 27 book chapters.
- 2 publications on teaching innovation.

- SJR publications: 20 / ISI: 11

Articles in Journals Rankings (SJR-SCOPUS):

- 10 articles in Q1.
- 4 articles in Q2.
- 5 articles in Q3.
- 1 articles in Q4.

Scientific Awards

- 4 scientific prizes.

Current professional situation

Employing entity: Universitat Oberta de Catalunya

Type of entity: University

Department: Arts and Humanities

Professional category: Associate Professor

Start date: 01/09/2020

Type of contract: Permanent employment contract

Dedication regime: Full time

Primary (UNESCO code): 520400 - Historical demography; 520401 - Fertility and marriage rate; 540302 - Demo-geography; 550200 - General history; 550600 - Specialized histories

Secondary (UNESCO code): 520000 - Demography; 520404 - Mortality; 540300 - Human geography; 550617 - History of medicine

Previous positions and activities

	Employing entity	Professional category	Start date
1	Universitat de Barcelona	Adjunct Professor	01/09/2016
2	Centro de Estudios Demográficos	Researcher	01/05/2016
3	Universitat Autònoma de Barcelona	Postdoctoral research	01/06/2012
4	Centro de Estudios Demográficos	Postdoctoral researcher	01/07/2011

	Employing entity	Professional category	Start date
5	Center for Economic Demography - Lund University	Postdoctoral researcher	01/11/2010
6	Centro de Estudios Demográficos	Postdoctoral researcher	03/09/2009
7	Universitat Autònoma de Barcelona	Research technician	01/05/2009
8	Centro de Estudios Demográficos	Predoctoral fellowship holder	01/02/2009
9	Instituto de Economía, Geografía y Demografía. Consejo Superior de Investigaciones Científicas	Predoctoral fellowship holder	01/01/2007
10	Universidad de las Islas Baleares	Adjunct professor	01/09/2005
11	Universidad de las Islas Baleares	Predoctoral fellowship holder	01/09/2002

- Employing entity:** Universitat de Barcelona
Professional category: Adjunct Professor
Start-End date: 01/09/2016 - 31/08/2020
Duration: 4 years
Type of contract: Temporary employment contract
Dedication regime: Part time
Performed tasks: Teaching of World Economic History
Type of entity: University
- Employing entity:** Centro de Estudios Demográficos
Professional category: Researcher
Start-End date: 01/05/2016 - 31/08/2020
Duration: 4 years - 4 months
Type of contract: Temporary employment contract
Dedication regime: Full time
Performed tasks: Head of the area of Historical Demography. Supervision of research works (doctoral theses and master's theses) and leading of research projects.
Type of entity: University Centres and Structures and Associated Bodies
- Employing entity:** Universitat Autònoma de Barcelona
Professional category: Postdoctoral research
Start-End date: 01/06/2012 - 30/04/2016
Duration: 3 years - 10 months
Type of entity: University
- Employing entity:** Centro de Estudios Demográficos
Professional category: Postdoctoral researcher
Start-End date: 01/07/2011 - 31/05/2012
Duration: 11 months
Performed tasks: Research
Type of entity: University Centres and Structures and Associated Bodies
- Employing entity:** Center for Economic Demography - Lund University
Professional category: Postdoctoral researcher
Start date: 01/11/2010
Duration: 9 months - 5 days
Performed tasks: Research
Type of entity: University Centres and Structures and Associated Bodies
- Employing entity:** Centro de Estudios Demográficos
Professional category: Postdoctoral researcher
Start date: 03/09/2009
Duration: 9 months - 12 days
Performed tasks: Research
Type of entity: University Centres and Structures and Associated Bodies

Education

University education

1st and 2nd cycle studies and pre-Bologna degrees

- 1 University degree:** Higher degree
Name of qualification: Diploma de Estudios Avanzados [M.A. in History]
Degree awarding entity: Universidad de las Islas Baleares **Type of entity:** University
Date of qualification: 15/04/2005
- 2 University degree:** Higher degree
Name of qualification: Licenciada en Historia [Degree in History]
Degree awarding entity: Universidad de las Islas Baleares **Type of entity:** University
Date of qualification: 01/06/2001

Doctorates

Doctorate programme: Doctora en Ciencias Históricas y Teoría de las Artes [PhD in History]
Degree awarding entity: Universidad de las Islas Baleares **Type of entity:** University
Date of degree: 27/07/2009

Other postgraduate university studies

- 1 Postgraduate qualification:** Análisis y diseño de aplicaciones informáticas (Métodos y técnicas para el estudio de la población II). [Methods and techniques for population studies II]
Degree awarding entity: Centro de Estudios Demográficos **Type of entity:** University Centres and Structures and Associated Bodies
Date of qualification: 01/02/2003
- 2 Postgraduate qualification:** Programador de aplicaciones informáticas (Métodos y aplicaciones informáticas para el estudio de la población I) [Methods and techniques for population studies I]
Degree awarding entity: Centro de Estudios Demográficos **Type of entity:** University Centres and Structures and Associated Bodies
Date of qualification: 01/02/2002

Specialised, lifelong, technical, professional and refresher training (other than formal academic and healthcare studies)

- 1** **Type of training:** Course
Training title: Formación inicial de prevención de riesgos laborales-UOC [risk prevention training]
City awarding entity: Barcelona, Catalonia, Spain
Awarding entity: Universitat Oberta de Catalunya **Type of entity:** University
End date: 08/11/2021 **Duration in hours:** 2 hours
- 2** **Type of training:** Course
Training title: Competència transversal de compromís ètic i global
City awarding entity: Barcelona, Catalonia, Spain
Awarding entity: Universitat Oberta de Catalunya **Type of entity:** University
End date: 02/07/2021 **Duration in hours:** 25 hours
- 3** **Training title:** Certificado Universitario en Análisis de Redes para Historiadores
Awarding entity: Universidad Pablo de Olavide **Type of entity:** University
End date: 20/04/2021 **Duration in hours:** 140 hours
- 4** **Training title:** De las microagresiones al acoso. Las mujeres en la investigación científica. [From microaggressions to bullying. Women in Scientific Research]
Awarding entity: Centres de Recerca de Catalunya (CERCA) **Type of entity:** Innovation and Technology Centres
End date: 08/01/2021
- 5** **Training title:** Curs de fonaments de Reglament General de Protecció de Dades [Basis of General Data Protection Regulation]
Awarding entity: Universitat Oberta de Catalunya **Type of entity:** University
End date: 15/11/2020 **Duration in hours:** 15 hours
- 6** **Type of training:** Course
Training title: Introducció a Python [Introduction to Python]
Awarding entity: Barcelona Activa **Type of entity:** Technological Centre
End date: 20/05/2020 **Duration in hours:** 6 hours
- 7** **Type of training:** Course
Training title: How to write a competitive ERC Consolidator Grant 2020 proposal
Awarding entity: Yellow Research B.V.; Generalitat de Catalunya (Spain)
End date: 28/10/2019
- 8** **Type of training:** Course
Training title: RRI o Recerca i Innovació Responsables: Què és i com la puc aplicar als meus projectes de recerca? [Responsible Research and Innovation]
City awarding entity: Barcelona, Spain
Awarding entity: Universitat Pompeu Fabra; Centro de Estudios de Ciencia, Comunicación y Sociedad
Training manager: Gema Revuelta de la Poza
End date: 07/11/2017

- 9** **Type of training:** Course
Training title: Curso Formación Presencial SCOPUS - Nivel Avanzado [SCOPUS Training Course - Advanced Level]
City awarding entity: Barcelona, Spain
Awarding entity: Fundación Española para la Ciencia y la Tecnología (FECYT) **Type of entity:** State agency
End date: 09/11/2015
- 10** **Type of training:** Course
Training title: Taller pràctic de formació en Comunicació 2.0 [Training workshop on Communication 2.0]
City awarding entity: Barcelona, Spain
Awarding entity: Universitat Pompeu Fabra **Type of entity:** University
End date: 28/10/2015
- 11** **Type of training:** Course
Training title: Database design and the intermediate data structure
City awarding entity: Amsterdam, Holland
Awarding entity: European Historical Population Samples Network **Type of entity:** University Centres and Structures and Associated Bodies
End date: 14/01/2015
- 12** **Type of training:** Course
Training title: Analysis of linked datasets
City awarding entity: Southampton, United Kingdom
Awarding entity: Administrative Data Research Centre for England. Southampton Statistical Sciences Research Institute. **Type of entity:** University Centres and Structures and Associated Bodies
End date: 21/10/2014
- 13** **Type of training:** Course
Training title: Curs introductori al programa R [Introduction to R Statistical Software]
City awarding entity: Bellaterra (Barcelona), Catalonia, Spain
Awarding entity: Centro de Estudios Demográficos **Type of entity:** University Centres and Structures and Associated Bodies
End date: 16/10/2012
- 14** **Type of training:** Course
Training title: Censos a lo largo de la Historia [Censuses throughout History]
City awarding entity: Madrid, Spain
Awarding entity: Asociación de Demografía Histórica (ADEH) **Type of entity:** Associations and Groups
End date: 19/06/2012
- 15** **Type of training:** Course
Training title: Using the population register of historical Quebec
City awarding entity: Rostock, Germany
Awarding entity: International Max Planck Research School for Demography. Max Planck Institute for Demographic Research **Type of entity:** University Centres and Structures and Associated Bodies
End date: 06/05/2011

- 16** **Type of training:** Course
Training title: Historical demography
City awarding entity: Lund, Sweden
Awarding entity: International Max Planck Research School for Demography. Centre for Economic Demography
End date: 02/09/2009
Type of entity: University Centres and Structures and Associated Bodies
- 17** **Type of training:** Course
Training title: Research Methods in Historical Demography
City awarding entity: Rostock, Germany
Awarding entity: International Max Planck Research School for Demography. Max Planck Institute for Demographic Research
End date: 29/05/2009
Type of entity: University Centres and Structures and Associated Bodies
- 18** **Type of training:** Course
Training title: Curso de análisis de supervivencia. [Course on Survival Analysis]
City awarding entity: Palma Mallorca, Spain
Awarding entity: Universidad de las Islas Baleares - Comisión de formación continuada de las profesiones sanitarias de la comunidad autónoma de las Islas Baleares.
End date: 20/06/2008
Type of entity: University Centres and Structures and Associated Bodies
- 19** **Type of training:** Course
Training title: Estadística aplicada a la demografía de la salud: mortalidad y salud de las poblaciones (IV). [Statistics applied to Demography of Health: mortality and health of human populations (IV)]
City awarding entity: Madrid, Spain
Awarding entity: Instituto de Economía, Geografía y Demografía. Consejo Superior de Investigaciones Científicas.
End date: 06/06/2008
Type of entity: University Centres and Structures and Associated Bodies
- 20** **Training title:** Introducción a Arcgis (IGIS) [Introduction to Argis (IGIS)]
Awarding entity: Environment systems research institute (ESRI)
End date: 26/10/2007
- 21** **Type of training:** Course
Training title: Demografía de la Salud: mortalidad y salud de las poblaciones
City awarding entity: Madrid, Spain
Awarding entity: Centro de Ciencias Humanas y Sociales. Instituto de Economía, Geografía y Demografía (CSIC)
End date: 06/06/2007
- 22** **Type of training:** Course
Training title: Estadística aplicada a la demografía de la salud: mortalidad y salud de las poblaciones (III). [Statistics applied to Demography of Health: mortality and health of human populations (III)]
City awarding entity: Madrid, Spain
Awarding entity: Instituto de Economía, Geografía y Demografía. Consejo Superior de Investigaciones Científicas.
End date: 01/06/2007
Type of entity: University Centres and Structures and Associated Bodies

23 Type of training: Course**Training title:** Longitudinal methods for historical demographic research**City awarding entity:** Ann Arbor, United States of America**Awarding entity:** Inter-University Consortium for Political and Social Research. University of Michigan**Type of entity:** University Centres and Structures and Associated Bodies**End date:** 30/07/2006**24 Training title:** Curso de Aptitud pedagógica (CAP) [Course of Pedagogical Aptitude (CAP)]**Awarding entity:** Instituto de ciencias de la educación - Universidad de las Islas Baleares**Type of entity:** University**End date:** 27/03/2002**Attended advanced, improvement and innovative teacher training and new technology courses and seminars focused on improving teaching****1 Title of course/seminar:** Formació en ciberseguridad [Cybersecurity training]**Organising entity:** Universitat Oberta de Catalunya**Type of entity:** University**Duration in hours:** 2 hours**Start-End date:** 31/03/2021 - 31/03/2021**2 Title of course/seminar:** Prevenció de violències masclistes des d'una perspectiva interseccional [Prevention of gender violence from an intersectional perspective]**Organising entity:** Institut de Centres de Recerca de Catalunya CERCA**Start-End date:** 10/12/2019 - 10/12/2019**3 Title of course/seminar:** Les TIC invisibles. Estratègies didàctiques per utilitzar les TIC a l'aula [Invisible ICTs Didactic strategies to use ICT in the classroom]**Organising entity:** Universitat de Barcelona**Type of entity:** University**Start-End date:** 28/10/2019 - 04/11/2019**4 Title of course/seminar:** Neuroproductivitat: descobreix una nova manera d'organitzar-te. [Neuroproductivity: Discover a new way to organize yourself]**Organising entity:** Universitat de Barcelona**Type of entity:** University**Start-End date:** 10/10/2019 - 24/10/2019**5 Title of course/seminar:** Eines TIC per afavorir el treball col·laboratiu. [ICT tools to promote collaborative work]**Organising entity:** Universitat de Barcelona**Type of entity:** University**Start-End date:** 04/10/2019 - 22/10/2019**Language skills**

Teaching experience

General teaching experience

- 1** **Name of the course:** Demografía [Demography]
University degree: Licenciado en Ciencia Social [Degree of Social Science]
Start date: 2021 **End date:** 2022
Entity: Universitat Oberta de Catalunya **Type of entity:** University
Faculty, institute or centre: Arts & Humanities
- 2** **Name of the course:** Desigualdad(es) [Inequality(s)]
University degree: Master en Historia Contemporanea [Master in Contemporary History]
Start date: 2021 **End date:** 2022
Entity: Universitat Oberta de Catalunya **Type of entity:** University
Faculty, institute or centre: Arts & Humanities
- 3** **Name of the course:** Geografía Humana [Human Geography]
University degree: Licenciado en Ciencia Social [Degree of Social Science]
Start date: 2021 **End date:** 2022
Entity: Universitat Oberta de Catalunya **Type of entity:** University
Faculty, institute or centre: Arts & Humanities
- 4** **Name of the course:** Historia Social [Social History]
University degree: Master en Historia Contemporanea [Master in Contemporary History]
Start date: 2021 **End date:** 2022
Entity: Universitat Oberta de Catalunya **Type of entity:** University
Faculty, institute or centre: Arts & Humanities
- 5** **Name of the course:** Geografía de Cataluña [Geography of Catalonia]
University degree: Licenciado en Historia, geografía y artes [Degree of History, Geography and Arts]
Start date: 2020 **End date:** 2022
Entity: Universitat Oberta de Catalunya **Type of entity:** University
Faculty, institute or centre: Arts & Humanities
- 6** **Name of the course:** Geografía económica [Economic Geography]
University degree: Licenciado en Historia, geografía y artes [Degree of History, Geography and Arts]
Start date: 2020 **End date:** 2022
Entity: Universitat Oberta de Catalunya **Type of entity:** University
Faculty, institute or centre: Arts & Humanities
- 7** **Name of the course:** Geografía rural [Rural Geography]
University degree: Licenciado en Historia, geografía y artes [Degree of History, Geography and Arts]
Start date: 2020 **End date:** 2022
Entity: Universitat Oberta de Catalunya **Type of entity:** University
Faculty, institute or centre: Arts & Humanities

- 8** **Name of the course:** Introducción a la geografía [Introduction to Geography]
University degree: Licenciado en Historia, geografía y artes [Degree of History, Geography and Arts]
Start date: 2020 **End date:** 2022
Entity: Universitat Oberta de Catalunya **Type of entity:** University
Faculty, institute or centre: Arts & Humanities
- 9** **Name of the course:** Métodos cualitativos y cuantitativos en Ciencias Humanas y Sociales [Qualitative and Quantitative Methods in Human and Social Science]
University degree: Licenciado en Historia, geografía y artes [Degree of History, Geography and Arts]
Start date: 2020 **End date:** 2022
Entity: Universitat Oberta de Catalunya **Type of entity:** University
Faculty, institute or centre: Arts & Humanities
- 10** **Name of the course:** Curso de verano: Métodos de investigación en Demografía Histórica para el tratamiento de datos censales y parroquiales. Modulo I: Construcción base de datos. [Summer Course: Research methods in Historical Demography for census and parish data]
University degree: Licenciados [University graduate]
Start date: 2017 **End date:** 2021
Entity: Asociación de Demografía Histórica - Centro de Estudios Demográficos
- 11** **Name of the course:** MOOC en Humanidades Digitales. "Open Source y Open Data" (Módulo Métodos y Herramientas). [MOOC in Digital Humanities. "Open Source and Open Data"]
Type of teaching: Virtual
University degree: Licenciados [University graduate]
Start date: 2018 **End date:** 2020
Type of hours/ ECTS credits: Hours
Hours/ECTS credits: 11
Entity: Universitat Autònoma de Barcelona **Type of entity:** University
- 12** **Name of the course:** Historia Económica Mundial [World Economic History]
University degree: Graduado o Graduada en Administración y Dirección de Empresas ADE [Business Administration and Management]
Start date: 2016 **End date:** 2020
Type of hours/ ECTS credits: Credits
Hours/ECTS credits: 6
Entity: Universitat de Barcelona **Type of entity:** University
- 13** **Name of the course:** Historia Económica Mundial [World Economic History]
University degree: Licenciado en Ciencias Económicas y Empresariales Sección Economía General [Economy]
Start date: 2016 **End date:** 2020
Type of hours/ ECTS credits: Credits
Hours/ECTS credits: 6
Entity: Universitat de Barcelona **Type of entity:** University
- 14** **Name of the course:** Seminario en la asignatura Teoría de la población y demografía: "Determinantes de la Transición Demográfica. Ejemplos, casos y prácticas". [Determinants of the Demographic Transition. Examples, cases and practices]
University degree: Graduado o Graduada en Sociología [Sociology]
Start date: 2017 **End date:** 2018
Entity: Universitat de Barcelona **Type of entity:** University

- 15** **Name of the course:** Seminario en la asignatura Temas Avanzados: Construcción de bases de datos [Databases building]
University degree: Official master's degree in Regional and Population Studies
Start date: 2010 **End date:** 2017
Entity: Universitat Autònoma de Barcelona **Type of entity:** University
- 16** **Name of the course:** Seminario en la asignatura arquitectura del software e-padrons [Seminar: e-censuses]
University degree: Licenciado en Informática Especialidad Tecnología y Arquitectura de Computadores [Software architecture]
Start date: 2012 **End date:** 2012
Entity: Universitat Autònoma de Barcelona **Type of entity:** University
- 17** **Name of the course:** Seminario en la asignatura Tendencias Historiográficas: La tendencia historiográfica de la Demografía Histórica [Historiography of Historical Demography]
University degree: Licenciado en Filosofía y Letras Sección Historia [History]
Start date: 2010 **End date:** 2010
Entity: Universidad de las Islas Baleares **Type of entity:** University
- 18** **Name of the course:** Curso de verano: La problemática de la salud desde la perspectiva de la historia y de la cultura. Fuentes para la historia de la medicina. [Summer course: health issues from historical and cultural perspective. Sources for History of Health]
University degree: Licenciado en Filosofía y Letras Sección Historia [History]
Start date: 2007 **End date:** 2007
Entity: Universidad de las Islas Baleares **Type of entity:** University
- 19** **Name of the course:** Historia Social de la Población en Época Contemporánea [Social History of Population in the Contemporary Age]
University degree: Licenciado en Filosofía y Letras Sección Historia [History]
Start date: 2005 **End date:** 2006
Type of hours/ ECTS credits: Credits
Hours/ECTS credits: 6
Entity: Universidad de las Islas Baleares **Type of entity:** University

Experience supervising doctoral thesis and/or final year projects

- 1** **Project title:** "Refugiats invisibles? El Comité national catholique de secours aux réfugiés d'Espagne i la gestió de l'ajuda humanitària a França entre 1939 i 1940. ["Invisible refugees? The Comité catholique de secours aux réfugiés d'Espagne and the management of humanitarian aid in France between 1939 and 1940]
Type of project: Doctoral thesis
Co-director of thesis: Solé, Q.
Entity: Universitat de Barcelona **Type of entity:** University
Student: Caballer, G
Date of reading: 2024
- 2** **Project title:** Dimensiones de la desigualdad socioeconómica en perspectiva histórica, siglos XVIII al XX. [Dimensions of socio-economic inequality in historical perspective, eighteenth to twentieth centuries]
Entity: Universitat Autònoma de Barcelona **Type of entity:** University
Student: Trincado, J
Date of reading: 2024

- 3** **Project title:** El matrimonio entre parientes: consanguinidad y afinidad en España, siglos XVI-XX. [Marriage among relatives: consanguinity and affinity in Spain, 16th - 19th centuries]
Type of project: Doctoral thesis
Entity: Universitat Autònoma de Barcelona **Type of entity:** University
Student: Ruiz, J.

Student: Jordà, J.P.

Date of reading: 05/07/2011

Type of entity: University

Participation in innovative teaching projects

- 1** **Project title:** Adquisició de competències transversals i classe inversa (2019PID-UB/041). [Acquisition of transversal skills and flipped classroom]

Type of participation: Team member

Number of participants: 17

Amount awarded: 1.000 €

Funding entity: Universitat de Barcelona

Start-End date: 2020 - 2021

Type of entity: University

Duration: 1 year

- 2** **Project title:** Grau de sensibilitat en la perspectiva de gènere en els i les estudiants universitaris. Diagnosi i propostes (REDICE 18-2203) [Degree of sensitivity on gender perspective in university students. Diagnosis and proposals]

Type of participation: Team member

Number of participants: 10

Amount awarded: 2.020 €

Funding entity: Universitat de Barcelona

Start-End date: 2018 - 2019

Type of entity: University

- 3** **Project title:** La perspectiva de género en la práctica docente de asignaturas de Historia y de Economía a diferentes grados (2015PID-UB/033) [Gender perspective in history and economics teaching]

Type of participation: Team member

Number of participants: 18

Amount awarded: 900 €

Funding entity: Universitat de Barcelona

Start-End date: 2015 - 2018

Type of entity: University

Participation in conferences with talks focused on teacher training

- 1** **Name of the event:** Pensar i difondre la història. Seminari de metodologia i recerca.

Type of event: Seminar

Date of presentation: 24/11/2020

Organising entity: Universitat Autònoma de Barcelona

Type of entity: University

2 Name of the event: Formació de personal en formació. [Training of personnel in training]

Type of event: Workshop

City of event: Barcelona, Catalonia, Spain

Date of presentation: 22/07/2019

Organising entity: Universitat de Barcelona

Type of entity: University

3 Name of the event: Jornada sobre Docència i Gènere [Seminar on teaching and gender]

Type of event: Seminar

Type of participation: Participatory - oral communication

City of event: Barcelona, Spain

Date of presentation: 16/01/2019

Organising entity: Institut de Ciències de l'Educació (ICE). Grup d'Innovació Docent TAAVE. REDICE18-1900

La sensibilització de gènere en l'estudiant universitari. Diagnosi i protestes. [Gender awareness in the university student. Diagnosis and protests].

4 Name of the event: Jornada sobre perspectiva de género en la docencia e investigación en universidades de España y América Latina. [Gender perspective in teaching and research in Universities in Spain and Latin America]

Type of event: Conference

Type of participation: Invited

City of event: Barcelona, Spain

Date of presentation: 25/05/2018

Organising entity: Facultad de Economía y Empresa (Universidad de Barcelona)

Type of entity: University Department

City organizing entity: Barcelona, Spain

Awards received for innovation in the field teaching

Name of the prize: Distinció a la trajectòria de Grups Docents 2019 [Award to learning-teaching trajectory]

Awarding entity: Universitat de Barcelona

Type of entity: University

City awarding entity: Barcelona, Catalonia, Spain

Proposed by: Grup d'Innovació Docent en Història Econòmica, Política i Social

Conferral date: 17/07/2019

Scientific and technological experience

Research and development groups/teams

- 1** **Name of the group:** Grup d'Innovació Docent en Història Econòmica, Política i Social. [Teaching Innovation Group in Economic, Political and Social History]
Type of collaboration: Co-authorship of projects and their development
Affiliation entity: Universitat de Barcelona **Type of entity:** University
Start date: 2016
- 2** **Name of the group:** Grupo de Investigación sobre el Pensamiento Científico, Filosófico y Contemporáneo. [Research group on scientific, philosophical and contemporary thought]
Type of collaboration: Co-authorship of projects and their development
Affiliation entity: Universidad de las Islas Baleares **Type of entity:** University
Start date: 2014
- 3** **Name of the group:** Grupo de Estudios de la Población. [Research group of population studies]
Type of collaboration: Co-authorship of projects and their development
Affiliation entity: Centro de Estudios Demográficos **Type of entity:** University Centres and Structures and Associated Bodies
Start date: 2009
- 4** **Name of the group:** Grupo de Investigación de Historia de la Salud [Research group of Health History]
Type of collaboration: Co-authorship of projects and their development
Affiliation entity: Universidad de las Islas Baleares **Type of entity:** University
Start date: 2001

Scientific or technological activities

R&D projects funded through competitive calls of public or private entities

- 1** **Name of the project:** Epidemias, estado y desigualdades socioeconómicas: predictibilidad y perdurabilidad, siglos XIX y XX (EPI-DESIGUAL). [Epidemics, State and Socioeconomic inequalities: Predictability and Durability (EPI-UNEQUAL)]
Entity where project took place: Universitat Oberta de Catalunya **Type of entity:** University
City of entity: Barcelona, Catalonia, Spain
Name principal investigator (PI, Co-PI....): Pujadas-Mora, J.M.; Salas-Vives, P
Nº of researchers: 7
Funding entity or bodies: Ministerio de Ciencia e Innovación. **Type of entity:** State agency
Name of the programme: Proyectos de generación de conocimiento 2021
Code according to the funding entity: PID2021 -1280100B-I00
Start-End date: 01/09/2022 - 31/08/2025 **Duration:** 3 years
Total amount: 53.425 €

- 2 Name of the project:** Prevenir las epidemias del pasado para curar las del presente: Explorando el Natural Language Processing y la estadística bayesiana para la construcción de modelos predictivos de expansión de epidemias (EPI-PREDICT). [Preventing past epidemics to cure present epidemics: Exploring Natural Language Processing and Bayesian statistics for building predictive models of epidemic expansion (EPI-PREDICT).]

Entity where project took place: Universitat Oberta de Catalunya **Type of entity:** University

Name principal investigator (PI, Co-PI....): Pujadas-Mora, J.M

Nº of researchers: 1

Funding entity or bodies:

Fundación BBVA

Type of entity: Foundation

Name of the programme: Becas Leonardo a Investigadores y Creadores Culturales 2022

Start-End date: 01/11/2022 - 30/04/2024

Total amount: 39.979,4 €

Applicant's contribution: The main objective of the EPI-PREDICT project is to develop models and tools for the visualization of the expansion of historical epidemics in order to create new instruments to contribute to the refinement of predictors of present and future epidemics by applying advanced statistics and artificial intelligence in an innovative way.

- 3 Name of the project:** Condicionantes demográficos de la desigualdad económica, una aproximación histórica (siglos XVIII-XX). [Demographic determinants of economic inequality. A historical approach (18th - 20th centuries)]

Entity where project took place: Centro de Estudios Demográficos **Type of entity:** University Centres and Structures and Associated Bodies

City of entity: Bellaterra (Barcelona), Catalonia, Spain

Name principal investigator (PI, Co-PI....): Pujadas-Mora, Joana Maria

Nº of researchers: 5

Funding entity or bodies:

Ministerio de Ciencia, Innovación y Universidades

Type of entity: State agency

City funding entity: Madrid, Community of Madrid, Spain

Code according to the funding entity: RTI2018-095533-B-I00

Start-End date: 01/01/2019 - 31/12/2022

Duration: 3 years

Total amount: 35.090 €

Applicant's contribution: Management, research and dissemination of results.

- 4 Name of the project:** Niveles de vida, salud, nutrición y desigualdad. Siglos XVIII-XXI. [Levels of life, health, nutrition and inequality. 18th-21th centuries]

Entity where project took place: Universidad de Murcia **Type of entity:** University

Name principal investigator (PI, Co-PI....): Martínez Carrion, J.M

Nº of researchers: 12

Funding entity or bodies:

Ministerio de Ciencia, Innovación y Universidades

Type of entity: State agency

Type of participation: Team member

Code according to the funding entity: RED2018-102413-T

Start-End date: 01/01/2019 - 31/12/2021

Duration: 2 years

Total amount: 15.000 €

5 Name of the project: Game of Crowds. Gamificación para la generación e interpretación del conocimiento histórico centrada en el usuario a partir de metáforas de redes sociales de patrimonio documental demográfico. [Game of Crowds project: User-centered gamification for generation and interpretation of historical knowledge through social media metaphors of documentary demographic heritage]

Entity where project took place: Centro de Vision por computador & Centro de Estudios Demográficos **Type of entity:** University Centres and Structures and Associated Bodies

City of entity: Bellaterra (Barcelona), Spain

Name principal investigator (PI, Co-PI....): Pujadas-Mora, Joana Maria; Lladós, Josep

Nº of researchers: 11

Funding entity or bodies:

Fundación Española para la Ciencia y la Tecnología (FECYT) **Type of entity:** Foundation

City funding entity: Madrid, Spain

Ministerio de Ciencia, Innovación y Universidades **Type of entity:** State agency

City funding entity: Madrid, Spain

Type of participation: Principal investigator

Name of the programme: Fomento de la Cultura Científica, Tecnológica y de Innovación (FCYT)

Code according to the funding entity: FCT-19-15244

Start-End date: 01/07/2019 - 01/01/2021 **Duration:** 1 year

Total amount: 19.500 €

Applicant's contribution: Management, research and dissemination of results.

6 Name of the project: Evaluando el estado de salud de las poblaciones españolas en perspectiva histórica a través de las fuentes de reclutamiento militar (Siglos XIX-XX). JIUZ-2018-SOC-15. [Evaluating the health status of Spanish populations in historical perspective through sources of military recruitment (Centuries XIX-XX)]

Entity where project took place: Universidad de Zaragoza **Type of entity:** University

Name principal investigator (PI, Co-PI....): Puche Gil, Javier

Nº of researchers: 2

Funding entity or bodies:

IberCaja Obra Social **Type of entity:** Foundation

City funding entity: Zaragoza, Aragon, Spain

Start-End date: 01/01/2019 - 31/12/2020 **Duration:** 2 years

Total amount: 2.000 €

Applicant's contribution: Methodological research and dissemination of results.

7 Name of the project: Women on the Move (WoMov). COST Project. European Cooperatin in Science & Technology

Entity where project took place: Université de Paris

City of entity: Paris, France

Name principal investigator (PI, Co-PI....): Ruiz, Marie Jose

Nº of researchers: 33

Funding entity or bodies:

The Horizon 2020 Framework Programme of the European Union

City funding entity: Brussels, Belgium

Type of participation: Team member

Name of the programme: COST-Project. European Cooperatin in Science & Technology

Code according to the funding entity: OC-2019-1-23859

Start date: 01/09/2020 **Duration:** 4 years

Total amount: 500.000 €

Applicant's contribution: Leader of the working group "Sources, limits and Constraints", and member of the management committee meeting.

- 8 Name of the project:** REDES: Tecnología e innovación ciudadana en la construcción de redes sociales históricas para la comprensión del legado demográfico. [Technology and citizen innovation for building historical social networks to understand the demographic past]

Entity where project took place: Centro de Estudios Demográficos - Centro de Visión por Computador

City of entity: Bellaterra (Barcelona), Catalonia, Spain

Name principal investigator (PI, Co-PI....): Pujadas-Mora, Joana Maria; Fornés, Alicia

Nº of researchers: 8

Funding entity or bodies:

RecerCaixa - Obra Social "la Caixa" - ACUP

Type of entity: Foundation

Start date: 15/02/2017

Duration: 2 years

Total amount: 96.942,57 €

Applicant's contribution: Management, research and dissemination of results.

- 9 Name of the project:** Constructing SHiP: towards a comparative history of health and disease in European port cities, 1850-1950

Entity where project took place: Radboud University Nijmegen

Type of entity: University

City of entity: Nijmegen, Holland

Name principal investigator (PI, Co-PI....): Janssens, Angélique

Nº of researchers: 8

Funding entity or bodies:

Dutch Research Council (NWO)

Start date: 01/01/2017

Duration: 3 years

Total amount: 50.000 €

Applicant's contribution: Research on the construction of a data collaboratory on causes of death and leading the Spanish team.

- 10 Name of the project:** Herramientas y procedimientos para la informatización masiva de las fuentes históricas de población. [Tools and procedures for the large scale digitization of historical sources of population]

Entity where project took place: Centro de Visión por Computador - Centro de Estudios Demográficos

City of entity: Bellaterra (Cerdanyola del Vallès), Spain

Name principal investigator (PI, Co-PI....): Lladós, Josep; Esteve, Albert

Nº of researchers: 6

Funding entity or bodies:

RecerCaixa - Obra Social "la Caixa" - ACUP

Type of entity: Foundation

Start date: 01/02/2015

Duration: 2 years

Total amount: 78.391 €

Applicant's contribution: Research, coordination, design and evaluation of the tools for data entry and record linkage and dissemination of results.

- 11 Name of the project:** Document analysis and knowledge modelling for cultural heritage actions in the Pyrenees region

Entity where project took place: Centro de Visión per Computador - School of Archival and Records Management - Laboratoire Bordelais de

Type of entity: University Centres and Structures and Associated Bodies

Recherche en Informatique - Institut de Recherche en
Informatique of Toulouse

City of entity: Bellaterra (Cerdanyola del Vallès), Catalonia, Spain

Name principal investigator (PI, Co-PI....): Ramos, Oriol

Nº of researchers: 8

Funding entity or bodies:

Agència de Gestió d'Ajuts Universitaris i de Recerca. **Type of entity:** State agency

Start date: 28/11/2014

Duration: 2 years

Total amount: 5.000 €

Applicant's contribution: Research on Historical Demography

- 12 Name of the project:** El tratamiento digital de las fuentes históricas locales. Tres experimentos en "Crowdsourcing" y acceso fácil. [Digital processing of local historical sources. Three experiments in crowdsourcing and user friendly access]
- Entity where project took place:** Universitat Autònoma de Barcelona **Type of entity:** University
- Name principal investigator (PI, Co-PI....):** Pujadas-Mora, Joana Maria; Cabré, Anna
- Nº of researchers:** 3
- Funding entity or bodies:** Ministerio de Economía y Competitividad
- Start date:** 01/01/2014 **Duration:** 2 years
- Total amount:** 78.650 €
- Applicant's contribution:** Management, research, training of transcribers and dissemination of results.

- 13 Name of the project:** Reconocimiento como Grupo de investigación consolidado de la Generalitat de Catalunya: Grupo de Estudios de la Población (GEP)
- Entity where project took place:** Universitat Autònoma de Barcelona **Type of entity:** University
- Name principal investigator (PI, Co-PI....):** Cabré, Anna
- Nº of researchers:** 12
- Funding entity or bodies:** Generalitat de Catalunya **Type of entity:** Body, others
- Start date:** 01/01/2014 **Duration:** 3 years
- Total amount:** 28.800 €
- Applicant's contribution:** Research on Historical Demography

- 14 Name of the project:** Catalanian data sample of the state census or registers of inhabitants of the decade 1880-1889
- Entity where project took place:** Centro de Estudios Demográficos; Max Planck Institute for Demographic Research **Type of entity:** University Centres and Structures and Associated Bodies
- Name principal investigator (PI, Co-PI....):** Cabré, Anna
- Nº of researchers:** 4
- Funding entity or bodies:** Max Planck Institute for Demographic Research **Type of entity:** University Centres and Structures and Associated Bodies
- Start date:** 01/04/2013 **Duration:** 3 months
- Total amount:** 14.500 €

Applicant's contribution: Coordination and design of the data sample. The data was a cross-sectional sample of some 20,000 individual from 1880s local census data of thirteen localities distributed throughout the geography of Catalonia.

15 Name of the project: Trends in Catalan Demographic History

Entity where project took place: Centro de Estudios Demográficos; Max Planck Institute for Demographic Research
Type of entity: University Centres and Structures and Associated Bodies

Name principal investigator (PI, Co-PI....): Cabré, Anna

Nº of researchers: 4

Funding entity or bodies:

Max Planck Institute for Demographic Research

Start date: 01/10/2011

Duration: 2 months - 19 days

Total amount: 15.000 €

Applicant's contribution: Coordination and design of the chronological inventory of nineteenth- and twentieth-century sources of demographic interest in Catalonia and the Balearic Islands

16 Name of the project: Five Centuries of Marriages

Entity where project took place: Centro de Estudios Demográficos; Universitat Autònoma de Barcelona; Centro de Visión por Computador
Type of entity: University Centres and Structures and Associated Bodies

Name principal investigator (PI, Co-PI....): Cabré, Anna

Nº of researchers: 6

Funding entity or bodies:

European Research Council

Start date: 01/05/2011

Duration: 5 years

Total amount: 1.847.400 €

Applicant's contribution: Scientific coordination, design, and evaluation of the crowdsourcing platform to build the Barcelona Historical Marriage Database and software for record linkage, research, training of transcribers, supervising research work (master's and doctoral theses) and dissemination of results.

17 Name of the project: Matrimonio y posición social en el área de Barcelona, 1451-1905. Construcción de una base de datos y análisis sociodemográfico. [Marriage and social position in the Barcelona Area, 1451-1905: Database creation and Socio-Demographic analysis]

Entity where project took place: Universitat Autònoma de Barcelona
Type of entity: University

Name principal investigator (PI, Co-PI....): Cabré, Anna

Nº of researchers: 5

Funding entity or bodies:

Ministerio de Ciencia e Innovación.

Start date: 01/01/2011

Duration: 3 years

Total amount: 75.000 €

Applicant's contribution: Design of a demographic database, data mining, training of transcribers and research.

18 Name of the project: Matrimonio y reproducción social en el área de Barcelona, 1600 - 1650. [Marriage and social reproduction in the Barcelona area, 1600-1650]

Entity where project took place: Center for Economic Demography - Lund University
Type of entity: University Centres and Structures and Associated Bodies

City of entity: Lund, Sweden

Name principal investigator (PI, Co-PI....): Pujadas-Mora, Joana Maria

**Nº of researchers:** 1**Funding entity or bodies:**

Ministerio de Educación

Start date: 01/11/2010**Duration:** 8 months**Total amount:** 23.850 €**Applicant's contribution:** Research and dissemination of results.

- 19 Name of the project:** Las redes científicas en la configuración de sistemas de salud pública en el siglo XIX: Las Conferencias sanitarias internacionales. [Scientific networks in the configuration of Public Health system in the 19th Century: International Sanitary Conferences]

Entity where project took place: Universidad de las Islas Baleares **Type of entity:** University**Name principal investigator (PI, Co-PI....):** Bujosa Homar, Francesc**Nº of researchers:** 8**Funding entity or bodies:**

Type of production: Scientific paper

Format: Journal

Relevant results: The so-called Russian flu pandemic, which affected different European countries from November 1889, reached the Balearic Islands in the last days of the year. The first cases were linked to the Palma customs office. The doctors of the time pointed out that half of the population fell ill, generally presenting mild clinical symptoms. However, the epidemic did not produce a significant increase in the crude mortality rates in the Balearic Islands or in any of the three main capitals we have studied. We note that the absence of deaths could be due to the advanced demographic transition in Mallorca. Key words: Pandemic, 1889, russian flu, hygiene, Isolation, demographic transition

DOI: 10.51964/hlcs11971

Type of production: Scientific paper

Format: Journal

Relevant results: The Barcelona Historical Marriage Database (BHMD) gathers records of the more than 600,000 marriages celebrated in the Diocese of Barcelona and their taxation registered in Barcelona Cathedral's so-called Marriage Licenses Books for the long period 1451-1905 and the BALL Demographic Database brings together the individual information recorded in the population registers, censuses and fiscal censuses of the main municipalities of the county of Baix Llobregat (Barcelona). In this ongoing collection 263,786 individual observations have been assembled, dating from the period between 1828 and 1965 by December 2020. The two databases started as part of different interdisciplinary research projects at the crossroads of Historical Demography and Computer Vision. Their construction uses artificial intelligence and computer vision methods as Handwriting Recognition to reduce the time of execution. However, its current state still requires some human intervention which explains the implemented crowdsourcing and game sourcing experiences. Moreover, knowledge graph techniques have allowed the application of advanced record linkage to link the same individuals and families across time and space. Moreover, we will discuss the main research lines using both databases developed so far in historical demography. Awarded: Louis Henry Award by the European Society of Historical Demography on recognizing methodological innovations in data collection, visualization or analysis of demographic data.

Relevant results: It is customary to consider population censuses (and statistics in general) as exclusive to the modern State, appearing in the second half of the eighteenth century but being developed and spreading in the West during the nineteenth century. Indeed, censuses help to strengthen and legitimize such states. However, in Spain, just as in Europe and the United States, the first population censuses considered modern were the result of, on the one hand, the directives and general and provincial coordination provided by the new state statistical institutions, such as the Statistics Commission or the Institute of Geography and, on the other, municipal personnel and the previous knowledge of local conditions held by the councils and other agents, such as the clergy, intellectuals, and notables. The media were also availed of for the cause. Let us recall that the municipalities were an explicit part of the state apparatus, therefore their relevance in carrying out censuses is not an indication of failure or weakness on the part of the Spanish State regarding the process of "bottom-up nation-building", but rather a way to imagine the nation through which collective involvement would build the nation from the locality.

Relevant results: The measures of sanitary watch, and especially the more radical ones such as cordons sanitaires, have usually been considered to be contrary to commercial interests and therefore negative for the economy in general. However, the countries of southern Europe, due to historical tradition, geography and even budget availability, had no other option than to adopt quarantine measures, following the criteria agreed at the International Health Conferences, if they wanted to continue participating in the international trade system. In fact, these restrictive measures did not stop the growth of trade, as the case of Mallorca shows along the 19th century. They were a formidable tool of the new liberal authorities to discipline the population and attack contraband, which, in addition to being a threat to health, contravened the bourgeois social order, the nation state and even certain aspects of capitalism.

Relevant results: Using data from the Barcelona Historical Marriage Database (BHMD), this study analyses the evolution of inequality and its relationship with the emergence of new social groups in the Barcelona area over a period of five centuries. It shows how levels of inequality in the ancient régime were higher by comparison with the industrial era. The mere fact of ascertaining the evolution of inequality over such a long period is unprecedented for any region in Spain and in most European countries. This study would not have been possible without the valuable information supplied by the data brought together in the BHMD. It is just one example of the enormous potential of the database. The results confirm that the social groups who generated economic inequality were not always the same, as evidenced in the breakdown of contribution to inequality by the different groups. A clear distinction is observed between the preindustrial and industrial periods. In the earlier phases, economic disparity is explained by the notable contribution of the nobility, while in more recent periods, the negative contribution (impoverishment) of unskilled workers generated greater inequality. These would have been day labourers, an occupation that did not figure in the Marriage licence books until the end of the eighteenth century, when a notable process of proletarianisation extending through the period of Industrialisation is observable. The composition of the economic elite varied over time. This study offers empirical and quantitative evidence of how the transition of the ancien régime to the industrial period brought about a change in the prominence of the wealthiest groups, shifting from the nobility to the bourgeoisie. Furthermore, long-term analysis has made it possible to situate accurately in time the process of substitution of some elites by others. In this regard, the data shows that when the weight of nobles and bourgeoisie is similar, the general inequality worsens. These results suggest that it is precisely in moments of economic and social transformation that disparities can have a greater impact, a crucial fact not only in the past but also the present, especially in a context where inequality keeps growing.

Relevant results: The objective of this study is to gain more comprehensive knowledge about social inequality in mortality in pre-industrial periods. With this aim, we have reconstructed the life courses of the inhabitants of the town of Vera in south-east Spain for the period 1797–1812 in order to estimate the influence of socio-economic status on ordinary and extraordinary mortality, given that, during this period, the town suffered from several epidemic outbreaks of yellow fever. As a result of these outbreaks, around a quarter of the town's population died. The results obtained indicate social inequality in mortality at least from the end of the eighteenth century. Although the differences are higher in mortality caused by non-infectious diseases or ill-defined causes, the coefficients also show a certain social gradient in mortality derived from infectious diseases. However, with respect to this

latter type of mortality, the place of residence - seems to have a greater influence on the chances of survival than socio-economic status

Relevant results: Nowadays, it is common in Historical Demography the use of individual-level data as a consequence of a predominant life-course approach for the understanding of the demographic behaviour, family transition, mobility, etc. Advanced record linkage is key since it allows increasing the data complexity and its volume to be analyzed. However, current methods are constrained to link data from the same kind of sources. Knowledge graph are flexible semantic representations, which allow to encode data variability and semantic relations in a structured manner. In this paper we propose the use of knowledge graph methods to tackle record linkage tasks. The proposed method, named WERL, takes advantage of the main knowledge graph properties and learns embedding vectors to encode census information. These embeddings are properly weighted to maximize the record linkage performance. We have evaluated this method on benchmark data sets and we have compared it to related methods with stimulating and satisfactory results.

Relevant results: In recent times, an intense historiographical debate has been developed on the female participation in rural labour markets and its impact on the gender wage gap before 1800. The underlying hypothesis which arises is that the increase in women participation in the labour market should lead to a reduction in the wage gap in parallel to an improvement in their life conditions. However, previous results are not conclusive in this regard. This article aims to address some of these issues from the island of Mallorca case study during the seventeenth century. In this work, an intense female participation in the labour market is shown, even higher than in other Mediterranean and Atlantic regions. In addition, the seasonality of the labour force demand in the island displays collusions, instead of complementarities, among different agrarian tasks, in contrast with what happened in Northern regions. Finally, we also explain why a high female occupation did not necessarily imply a significant reduction of the gender wage gap.

Relevant results: The economic inequality in the area of Barcelona for the period 1481 – 1880 has been estimated continuously through the use of the Marriage License Books from the Diocese of Barcelona, a unique fiscal source which ranged society from nobility, the highest level of payment, to the poor, exempted in fixed taxes. These taxes together with the social status information of each individual allow setting fiscal progressivity. The results show how the levels of inequality were higher in preindustrial periods. However, industrialization with a deskilling occupational process and the emergence of a new working-class reinforced inequality due to a proletarianization effect. This article has been also published in a shorter version for the specialized blog in economics "Nada es gratis" (<http://nadaesgratis.es/admin/la-desigualdad-a-largo-plazo-en-barcelona-1481-1880>)

Relevant results: This article aims at studying the intergenerational transmission of status within farmers and artisans in the preindustrial area of Barcelona from a siblings' attainment perspective in a context of impartible inheritance. The data source used are the Marriage License Books from the Barcelona's Diocese compiled in the Barcelona Historical Marriage Database, which for the 16th and 17th centuries provides a rich and continuous demographic and socioeconomic information through the use of the multilevel regression analysis. Our main findings points out the important family impact on the social fate of children. First-married children were the maximal inheritors of parental statuses in all social groups, especially for farmers and artisans, the former being more linked to ascription than the latter. However, farmers were found to be the group with the highest intergenerational occupational inheritance although artisans were who transmitted at most their social group. This divergent effect is due to the different strategies, or in a way a same strategy, used on non-first married children to whom, families from the two social groups, when not able to transmit the same parental occupation, preferred to position the offspring in artisans' careers thanks to a favourable context of a flourishing manufacturing industry at the countryside.

Relevant results: It has been amply demonstrated that individuals; reproductive capability is the key explanatory phenomenon for understanding onomastic disappearance during the early modern period. This paper analyzes the evolution and consequences of surname extinction in a specific population: Catalonia in the 16th and 17th centuries. In this paper two aspects are examined. First, the observed disappearance of surnames is estimated through historical data collected in the Llibres d'Esposalles (Marriage Books) from 1481 to 1600 at Barcelona Cathedral. Second, the estimated natural extinction of those surnames registered in 1481 is forecast by applying a statistical branching process. The main findings point out that emigration or subsistence crises were not substantially significant enough to alter the natural processes of surname extinction between 1481 and 1600 due to the lack of biological continuity of their bearers, despite the patrilineal transmission system. This system

could accelerate these extinction processes, as almost the female surname branches were excluded from naming transmission.

Relevant results: The 19th century can be considered the golden age of cordons. Never before had Europeans adopted this type of measures so intensely or at such a fast pace. The article aims to analyze how the process of rationalization and militarization of sanity cordons performed in the anti-epidemic fight in the 19th century of the island of Mallorca (Spain). These cordons should be understood as a declaration of war by the authorities on the emerging epidemics. They could generate unbearable and significant mortality crises that the new liberal citizenship found unacceptable. The toleration of this type of measures was the result of a general consensus, with hardly any opposition, which not only obtained the support of scientists (especially from the medical class) but also of most of the local and provincial political elite, and even of the population at large.

Relevant results: Labour market transformation and inequality were fundamental aspects in the transition to the industrialisation. This article reconstructs the Barcelona's area economic structure across the 18th and 19th centuries through the Marriage Licences of the Barcelona's Cathedral. These documents registered a proportional tax paid by the spouses' according to their occupational and social status. Since 1780, an important decrease in the primary sector and an increase in the secondary and tertiary sectors are observed. Inequality between economic sectors rose and also within the secondary sector (textile) due to the proletarianization of the workers. Conversely, there was not an increase in inequality in the primary sector while it decreased in the tertiary sector.

Relevant results: The province of Tarragona holds the highest life expectancy of all the Spanish provinces, which increased year per year as the century progressed. The evolution of general mortality, infant mortality, and causes of death in the province of Tarragona are analyzed in comparison with Catalonia and Spain. The data used was derived from statistics on deaths classified according to cause of death from the Instituto Nacional de Estadística and the Institut d'Estadística de Catalunya. This epidemiological study has been performed by grouping major causes of death; and the methodology used is that of indirect standardization. The results show: that between 1900 and 1935, life expectancy increased about 20 years; and that women's life expectancy grew more than that of men. Life expectancy improvement for Tarragona is due to the lower incidence of diseases caused by infectious

diseases, promoting quality of life through the pioneering efforts of hygienists (mainly between 1910-1920), education, high levels of parental literacy, good diet in nutrients, and good weather.

Relevant results: In 1215 the 4th Council of Lateran ruled out marriages among relatives up to fourth level of consanguinity and second level of affinity. This norm was valid until the early 20th century. It is striking that, in spite of the strength and persistence of the interdiction, consanguineous and affine marriages were not uncommon, and their frequency even increased in the 19th century in different countries. This situation occurred in a time when the context, as the Demographic Transition, the Industrialization or a strong migration from the countryside to the cities, favoured the exogamous marriages. However, the migration to the cities and the agrarian capitalism contributed to restructuring the property of land, originating new family alliances in order to obtain more control on the land and to increase the work force of the domestic units. Our contribution focus on affinity in the Barcelona area during the 19th century (1780 – 1880), using the information contained in the Barcelona Historical Marriage Database (BHMD) exploring two of such forms: Simultaneous marriages of two or more couples of siblings and Marriages of widowers or widows with the sister or brother of their deceased spouses, phenomena known as levirate and sororate. The main findings show how the marriages of widowers or widows with the sister or brother of their deceased spouses appear to be the kind of affine marriages more common as time goes by during our period of analysis. Nevertheless, the maintenance of a certain level of simultaneous marriages between two or more couples of siblings show how interest in keeping family heritage did not disappear but it even persisted during the period of Industrialization.

Relevant results: The aim of this study is to present the outbreak of plague occurred in Mallorca from May to December 1820. The significance of this episode must be understood in the double context in which it occurred: the impact on the Majorcan society and its relationship with new health proposals in a period of change both the way the state began to get involved in the management of public health, and the development of new paradigms in the field of medicine. We try the following topics: features of its evolution, analysis of the controversies that were generated on the nature of the disease, description of health policies undertaken to stop its expansion, and its impact outside the island. The information used comes from three sources: the writings of the doctors who were involved in the epidemic, the the press of the time (Palma and Barcelona). The correspondence of the French consular representatives in the Balearic islands (Archives du Ministère d'Affaires étrangères, La Courneuve).

Impact index in year of publication: 0,187

Relevant results: This study aims at contributing to the regional analysis on the role played by rural labourers in the arising of agrarian labour markets in Majorca during the 18th century. Previous studies about the Majorcan rural society in the 17th and 18th centuries have pointed out that the processes of rural wage labour took place early and intensively, however the importance of these labourers has been disdained. The aim of this article is identifying the rural servants from the olive oil's sector in Majorca during the 18th century, sector in which the wage labour developed deeply. The main sources will be the accounting books from the Count of Formiguera states due to the absence of other local sources with socio-occupational data. These sources also offer some data on the servants as their civil status and age. Through the systemisation of such data, this study argues that the servants on the analysed farms were mainly adults hired for short-term periods, fact that would distinguish them in terms of demographic and social profiles from their homonyms in northern European countries, which were hired young with long-term contracts.

Relevant results: The purpose of this article is to make an empirical contribution to the reconstruction of female wages in the pre-industrial agricultural sector. Despite the complexity involved in the construction of wage-series, particularly wages of women, it is worthy continuing using and improving the series in order to understand the social and economic functioning of pre-industrial agrarian societies. The study focus on the island of Majorca where an important olive oil specialization through large farms took place along the 17th century exporting its surplus to the international market. Female and child labour were massively hired in those farms. Thus, the recruitment and remuneration of the female labour force became a key factor in the reproduction of this agricultural system. For these reasons, the knowledge of the evolution of wages is a crucial element in capturing the evolution of the exploitation expenses of landlords and tenants, as well as the importance of wages in the income and living standards of agricultural families.

Relevant results: Catalan onomastics has been conditioned by various demographic, political and social processes which have imparted to it singular characteristics over the course of centuries since the Middle Ages, and the examination of which may facilitate the reconstruction of population behavior in the past. The combination of these factors resulted in a significant number of changes in the distribution and number of surnames in the early modern age. This paper aims to analyse from an overall perspective the demographic and socio-historical factors which determined the emergence, permanence or extinction of Catalan surnames in the sixteenth and seventeenth centuries. The source are the Marriage License Books from the Diocese of Barcelona, which offer continuity over time and great onomastic richness.

Relevant results: French immigration in Modern Catalonia has been considered a key factor for the overcoming of the Late Middle-Ages population crisis, although its importance has been questioned recently. The lack of wide scope studies could hamper the obtaining of the complete picture. The objective of this work is to provide an overview of this migratory wave for a large chronological period, from the bishopric of origin to the settlement parish in the Area of Barcelona. The study has been carried out from a renowned source that has never been before used in depth for this kind of research: the Llibres de Esposalles (marriage license books) from the Cathedral of Barcelona, preserved since 1451 and that have been used for the construction of the Barcelona Historical Marriage Database. A complete descriptive analysis allowed us to trace and cartography the origin and settlement of French migrants as far as the second half of XVth century, highlighting important differences among the coast and interior territories as well as great incidence in the delta of river Llobregat.

Relevant results: The two transcription systems had different starting points. The Spanish system was created to transcribe the marriage licenses books covering the period 1451 to 1905 for the Barcelona area; likely one of the world's longest series of preserved vital records. Thus, in the Project "Five Centuries of Marriages" (5CofM) at the Autonomous University of Barcelona and Center for Demographic Studies the Barcelona Historical Marriage Database has been built. The more than 600,000 records have been transcribed by 150 transcribers working online. The Norwegian material is cross-sectional and different as it is the 1891 census, originally recorded on one sheet per person. This format and the underlining of keywords for several variables made it easier to automate some of the data entry than when information about many persons is listed on the same page. While Optical Character Recognition (OCR) for printed text is scientifically mature, computer vision research is now focused on more difficult problems such as handwriting recognition. In the marriage project document analysis methods have been proposed to automatically recognize the marriage licenses. Fully automatic recognition is still a challenge, but some promising results have been obtained. In both Spain, Norway and elsewhere the source material is made available as scanned pictures on the Internet together with unique page references, opening up for further international cooperation about automating the transcription of historic source materials.

Relevant results: The aim of this article is to analyze the relationship between the hygienistic discourse on water cycle and the sanitary interventions carried out by the town councils of Mallorca from 1855 to 1936. The purpose of the discourse was to make the population and the municipal authorities aware of the importance of improving the water supply. The used sources have been municipal minutes, press and scientific articles from that period. Our main conclusion is the lack of timing between the hygienistic proposals and the undertaken interventions. Nevertheless these late interventions were useful to improve the quantity and the quality of the water that the citizens were supplied. The water interventions were attempted at the same time than other sanitary actions, such as isolation measures (quarantines) or town walls demolition, reforms done by the municipal or provincial authorities having a scientific consensus too. Relevant results: The Liberal State in Spain organized a jerarquical and centralized model of government in a period when Hygienic was one of the main issues in Public Health field. The paper analyses the legal developments on Public Health along 19th century Spain, as well as how and when local governments –in that case Balearic Islands– applied the new laws. Following the proposals of several historians (among them S. Szreter) the main attention is given to the objectives of that legislation (specially on cholera), as well as the policies followed in terms of Hygienic and medical health, in order to establish their relationship with the early mortality decline observed in the Balearic Islands at this time.

Relevant results: The article summarizes the experiences of the application of the Historical International Standard Classification of Occupations (HISCO) on the data for the Catalanian population from the 15th to the 20th century. Using population and working class censuses as well as marriage registers, it demonstrates the advantages and disadvantages of HISCO as a coding system. The paper proposes different solutions in coding and classification methodologies in order to refine the occupational classification process. So, it has been given priority to occupation rather than to occupational category or it has been created a new subsidiary classifications regarding to the institutional adscription or the nobility. It has been download 1240 times.

Relevant results: Late medieval Catalan anthroponymy was marked by different historical, social and economic processes that altered their number, prevalence and distribution substantially. During this period, onomastics in general and surnames in particular were subject of socio-political changes and the continuous flows to the cities of the rural population, the homeless, pilgrims and traders, and to a lesser extent, to immigrants from the Kingdom of France, the Crown of Aragon and the rest of Europe. The aim of this paper is to analyse these changes in depth, describing how they affected the existing surnames in the Barcelona area from the late Middle Ages to the early Modern Period (1451-1500). The area selected for research is the city of Barcelona and its immediate hinterland. This region was chosen for its demographic, historical and political importance as well as for its anthroponymic

diversity. Therefore it was necessary to turn to a source such as the catholic Marriage Books (Llibres d'Esposalles) archived in the Cathedral of Barcelona preserved in the Barcelona Historical Marriage Database (BHMD), which covers the city of Barcelona and its environs.

- 29** Cámara, A.D.; Pujadas-Mora, J.M. The implications of the relationship between height and mortality for historical demography. Evidence from contextual and individual approaches in 19th Century Spain. *Papers de Demografia*. 440, 2014.

Type of production: Scientific paper

Format: Journal

Relevant results: This study analyzes the relationship between two indicators of living conditions (adult mean height and mortality) at the level of populations and individuals. While height and mortality have been extensively used in the analysis of living standards at a contextual level (e.g. by means of time-cohort series) the study of the relationship between the net nutritional status resulting from pre-adult living conditions (mirrored in adult height) and the length of life of individuals, is a much less explored field due to the difficulties associated with the collection and linkage of these two type of data from archival sources. The exposure to disease (non-fatal morbidity) together with some degree of mortality-related selection might have buffered or even suppressed the expected socioeconomic gradient in survival that is observed among contemporary societies. Actually our results point to a greater impact of environmental hazards on the biological status of the rural elite. In light of the control exerted in our models, it is reasonable to hypothesize that upper classes did not exhibit lower survival rates associated with infectious causes of death due to the fact that they tended to live in town but due to other plausible factors like the fact of a less intense process of mortality selection during pre-adult ages (in absence of empirical evidence this is necessarily speculative) and/or due to their tallness, a factor of proved disadvantage in itself in face of infectious diseases leading to death.

Category: D

Relevant results: This paper aims to identify migration flows during the first half of the XVI century. To achieve this goal we analyze population movements using the distribution and emergence of family names. For that purpose the Catalan household tax counts (fogatges) of 1497 and 1553 are used. These counts were made for fiscal purposes and collected each family unit (household) of the region by villages. Firstly we conduct a descriptive analysis of the data, focusing on the most common surnames of that period. Secondly, the spatial distribution of these surnames among the two aforementioned periods (1497 and 1553) is analyzed, mapping their distribution throughout time. Finally, we concern on the degree of interrelation among different regions of Catalonia in that time (col·lectes) applying the coefficient of Chen and Cavalli-Sforza (1983). As a result several population flows are recognized. Population movements north to south were predominant, and territories such as Lérida, Tarragona, the south and the coast of Catalonia, were regions of attraction.

Relevant results: Social Medicine boosted the use of the quantification as a way of evaluating the health status of populations at the end of the nineteenth century. In Majorca, hygienists as the physicians Enric Fajarnés, Bernat Riera, Antoni Mayol and Emili Darder and the road engineer Eusebi Estada sought for a better understanding of the health status trough the use of the estimations of the population growth, the demographic and epidemiological profile and the explanation of influence of weather on mortality. These calculations showed the good health status

of the Balearic population in comparison to the Spanish one. These results were explained due to the benevolence of the insular climate and so Public Health reforms were needed.

Relevant results: The Balearic Demographic Transition has been considered a forerunner in the Spanish context due to a high life expectancy of 42 years in the decade of 1860, owing primarily to low infant mortality. For a more in-depth evaluation of the factors behind this exceptional health situation, it is analyzed the role played by Hygienism in the decline of mortality due to the Infant Welfare movement and Public Health reforms that took place at the end of the 19th century and in the first decades of the 20th century. Both processes were led by a variety of community stakeholders such as physicians, engineers, nuns, lawyers, as evidence of a social consensus in the fight against the so-called 'avoidable' causes of disease and death.

Type of production: Scientific paper

Format: Journal

Relevant results: Five Centuries of Marriages project is a long-term research initiative based on the data-mining of the Libros de Esponsales (Marriage Licenses Books) conserved at the Archive of the Barcelona Cathedral to construct an exhaustive database named the Barcelona Historical Marriage Database (BHMD). This extraordinary data source comprises 291 books of marriage licenses records, with information of approximately 600.000 unions celebrated in over 250 parishes of the Diocese between 1451 and 1905. These books compiled information on the tax posed on each couple depending on their social class. This fiscal marker, as well as the exhaustive nature of the source and the variety of types of the parishes involved, from the city centre to the most rural villages, allows for the execution of a project oriented towards the multiple aspects of demographic research, especially in the very long view. The investigations are being carried out included topics like population estimates, marriage dynamics, cycles, and indirect estimations for fertility, migration and survival, as well as socio-economic studies related to social homogamy, intra-generational social mobility, and inter-generational transmission and sibling differentials in social and occupational position. The technical component of the project is also one of its significant contributions. Meaningful examples of this are the methodological research on linkage of identities and kinship, aiming to reconstruct families through their generations, or the establishment of interdisciplinary links and permanent cooperation between research in Historical Demography and research in Computer Science, having for common grounds the automatic reading, recognition and transcription of manuscript data.

Relevant results: During the 19th century, prostitution aroused strong emotions in most European cities. Palma de Mallorca was no exception and, in common with many Spanish cities at that time, regulated this activity. The objectives of the article are to analyze the Mallorcan medical discourse on syphilis, evaluate the concept of venereal disease as social stigma and, finally, examine municipal policy on prostitution. There was a lack of debate among the Majorcan medical profession over syphilis as a social matter because the only existing debate was from a medical point of view. The municipal regulation of prostitution in the city of Palma was consistent with

the common practice in Spain, although the central government did not establish a unitary model. Therefore, few aspects can be named as exclusive to the city, except perhaps the city's intention to establish a hospital for treating venereal diseases under the auspices of a religious congregation

Relevant results: e en este trabajo analizaremos la lógica y el funcionamiento de este tipo de instituciones en unos momentos en los que se consideraron una de las únicas medidas asistenciales para contener la expansión de una epidemia y, por este motivo, fueron objeto de creciente atención, tanto una vez declarada como en los proyectos elaborados cuando se atisbaba su amenaza. Nuestro campo de estudio será Mallorca en el periodo que va de 1820 a 1885. De esta forma, constataremos la utilización de los hospitales provisionales durante las epidemias de peste de 1820 en la comarca de levante y de cólera en Palma en 1865, comparándolos con los dispuestos para combatir las epidemias de fiebre amarilla (1821 y 1870) vividas también en la capital de las Baleares, así como en las posteriores oleadas de cólera que recorrieron Europa, aunque estas no llegaron a afectar a la isla de Mallorca. Esta amplia cronología, además, nos permitirá conocer un tipo de actuación anterior a ley de 1849 por la que se reguló este tipo de infraestructuras y sus servicios.

Relevant results: Migration was a key element in the 'economy of makeshifts' of the poor. We examine such migration through a case study of late eighteenth-century Catalonia. We identify areas where seasonal migration formed an important part of the household economy of the poor, and explore how this migration fitted into local labour markets. We also use records for the men, women and children admitted to the Barcelona workhouse over the period 1762–1803. We compare those born inside the city with those born elsewhere. We show that migration varied by gender, age, occupational background and place of origin. In particular, we show how migrant flows into Barcelona were determined by the demand for male and female labour and by the local economy of these places of origin.

Format: Book

Relevant results: This study seeks to analyse the factors that determined women's intense participation in seasonal (harvesting) migration in the Mediterranean region, through the case study of Majorca throughout the preindustrial period. To this effect, inequality in access to land and cereal agriculture explain the origin of women olive pickers. However, the link between inequality, agricultural specialization and migration is not entirely straightforward. Economic power and information networks based on landlords', stewards' and foremen's places of birth and the information chains through shepherds, servants and other rural workers, the means by which

landowners and female gatherers knew about labour supply and demand and working conditions, may also have determined the migratory decision.

Type of production: Book chapter

Format: Journal

Relevant results: It is customary to consider population censuses (and statistics in general) as exclusive to the modern State, appearing in the second half of the eighteenth century but being developed and spreading in the West during the nineteenth century. Indeed, censuses help to strengthen and legitimize such states. However, in Spain, just as in Europe and the United States, the first population censuses considered modern were the result of, on the one hand, the directives and general and provincial coordination provided by the new state statistical institutions, such as the Statistics Commission or the Institute of Geography and, on the other, municipal personnel and the previous knowledge of local conditions held by the councils and other agents, such as the clergy, intellectuals, and notables. The media were also availed of for the cause. Let us recall that the municipalities were an explicit part of the state apparatus, therefore their relevance in carrying out censuses is not an indication of failure or weakness on the part of the Spanish State regarding the process of "bottom-up nation-building", but rather a way to imagine the nation through which collective involvement would build the nation from the locality.

Relevant results: This chapter describes a complete system for the extraction of information of historical population documents. This system has been constructed as a result of several multidisciplinary projects bringing together researchers in computer vision, pattern recognition and historical demography. The chapter describes different contributions ranging from low level processing for document image enhancement, to the semantic recognition of named entities and their linkage. The proposed system gives a key role to the user, in the transcription and validation processes. User engagement experiences of crowdsourcing and gamesourcing are described. The resulting knowledge base is organized in a social network model, so the browsing of the data can be provided accordingly.

DOI: 10.21125/edulearn.2019.1421

Type of production: Book chapter

Format: Book

Relevant results: This paper is part of a broader project named 'Sensitivity about the perspective of gender of university students. Diagnosis and proposals', which is financed by the program "Aids to Research in University Teaching REDICE 2018" of the University of Barcelona. Its main objective consists on evaluating the sensitivity about gender among the university students of different degrees in two universities of latitudes and very different economic, social and political contexts. In particular, we compare gender awareness in the degrees of Economics, Business Administration, Sociology, Political Science and History of the University of Barcelona (Spain) with the degrees of Economics, Business, Labor Relations and History of the University of Cartagena de Indias (Colombia). This comparison between such different contexts aims to help our understanding of how to improve the implementation of a gender perspective in university studies in general. The University of Barcelona is a public university in a socio-political context where gender equity would be a defining feature of development, while the University of Cartagena de Indias (Colombia) is a small public university in a context in which equity of gender is underdeveloped. However, this multiethnic and multicultural university is very politicized and sensitized on gender issues. We analyze the awareness on gender issues of the students of the two universities in two different moments of their academic cycle: in the first year, when they start their studies at university, and in the fourth year, at the end of the degree. The analysis is based on a survey with forty questions. Twenty of them are about the profile of the students and their families as well as their socioeconomic context; the rest are questions about sensitivity, awareness and knowledge on gender issues. These surveys have already been applied to a sample of 1650 students. Here we present the main conclusions of these first surveys.

The Baix Llobregat (BALL) Demographic Database, between Historical Demography and Computer Vision (nineteenth – twentieth centuries). Nominative Data for Demographic Research in the East and the West. pp. 29 - 61. Ural Federal University press, 2019. ISBN 978-5-7996-2656-3

Type of production: Book chapter

Format: Book

Relevant results: The Baix Llobregat (BALL) Demographic Database is an ongoing database containing individual census data from the Catalan region of Baix Llobregat (Spain) during the nineteenth and twentieth centuries. The BALL Database is being built up within the project 'Tools and procedures for the large scale digitization of historical sources of population' (<http://dag.cvc.uab.es/xarxes/>) directed by Alícia Fornés from the Center for Computer Vision and Joana Maria Pujadas-Mora from the Center for Demographic Studies, both at the Universitat Autònoma de Barcelona, funded by Recercaixa program (2017-2019). The aim of the project is to develop technologies to facilitate the massive digitalization of demographic sources more specifically those called padrones (local censuses) to create historical 'social' networks having computer vision as enabling technology. Such networks can be created/assessed thanks to the linkage of nominative information compiled in the local censuses across time and space to establish individual and family lifespans and to spatially locate individuals and families. http://elar.urfu.ru/bitstream/10995/73898/1/978-5-7996-2656-3_2019.pdf

Type of production: Book chapter

Format: Book

Relevant results: Maritime and inland sanitary cordons were often used during the XIXth century to protect the island of Mallorca against imported epidemics. These measures were traditional in southern Europe. In Mallorca sanitary control and isolation became more adapted to the new times imposed by the culture of liberalism. Parallel with new State legislation, the advances in hygiene in certain sectors of medicine in addition to the

legal reservations that might arise in the more liberal sectors of society, explain the gradual relaxation the use of terrestrial cordons from the second half of the XIXth century in Mallorca. This it was shown when the city of Palma was not cordoned either in 1865 or in 1870, despite the havoc caused by Cholera and Yellow fever and in spite of the calls of the press and the Permanent Commission of Health to that end, something that was the exact opposite of what occurred in the epidemic of 1820 and 1821. From now on, one of the three most repressive means of isolation has disappeared. Terrestrial containment of infectious foci was no longer used. Protection from the Continent by a maritime-terrestrial coastline cordon continued, as did the terrestrial defensive cordon in villages considered healthy.

ISBN 978-84-9888-858-4

Type of production: Book chapter

Format: Book

Relevant results: The contribution of History to the study of demographic behaviors of populations is usually limited to a set of general references that if they are contrasted with nowadays research, they are totally out of step. The purpose of our study is to dismantle some of these references – everybody died like rats, plague was the cause of all epidemics, families in agrarian societies were always stem families, everybody was short- using the most recent advances in the field of Historical Demography (which includes categories such as Demographic Transition or proposals from the History of the Family, or the History of Medicine). At the same time, we show the necessity of incorporating to the historical syntheses the nature of the demographic systems that condition the evolution of societies to show the complexity of these societies.

Type of production: Book chapter

Format: Book

Relevant results: Despite the efforts in the last decades, the amount of historical manuscripts that have not yet been transcribed is still huge, and specifically the population documents, which are useful for disciplines as Historical Demography. Consequently, they have not been properly indexed and their contents are not available through search platforms. Since manual transcription requires enormous human efforts, the challenge is to go towards an automatic transcription. However, the state of the art in handwriting recognition still need more development before trusting a completely automatic transcription. For this reason, human assisted approaches with gamesourcing based on handwriting recognition and keyword spotting are being used.

- 49** Chen, J.; Fornés, A.; Mas, J.; Lladós, J.; Pujadas-Mora, J. M. Word-Hunter: Speeding up the transcription of historical documents through gamesourcing. 13th IAPR International Whokshop on Document Analysis System. pp. 23 - 24. 2017. Available on-line at: <https://das2018.cvl.tuwien.ac.at/media/filer_public/85/fd/85fd4698-040f-45f4-8fcc-56d66533b82d/das2018_short_papers.pdf>.

Type of production: Book chapter

Format: Book

Relevant results: Nowadays, there are still many handwritten historical documents in archives waiting to be transcribed and indexed. Since manual transcription is tedious and time consuming, the automatic transcription seems the path to follow. However, the performance of current handwriting recognition techniques is not perfect, so a manual validation is mandatory. Given that crowdsourcing is usually boring, we propose experiences based in gamification to increase the interest of users. Concretely, we propose to validate the automatic transcription via gamesourcing through an application for Android mobile devices.

- 50** Pujadas-Mora, J.M.; Fornés, A.; Lladós, J.; Cabré, A. Bridging the gap between Historical Demography and Computing: Tools for computer-assisted transcription and analysis of demographic sources. *The Future of Historical Demography*. pp. 222 - 226. Acco, 2016. ISBN 978-94-6292-722-3

Type of production: Book chapter

Format: Book

Relevant results: The construction of large-scale databases in the field of Historical Demography has proliferated in recent decades as a result of development of information's technologies and specific financing for research

projects. Indeed, it is said that we are in the midst of a Big Data Revolution. However, the data building is still a time-consuming process mainly due to the manual data entry and as well as the lack of digital copies of the original sources. The interdisciplinary work between historical demography and computer science can shorten the building of individual databases applying automatic handwriting techniques as wordspotting.

- 51** Jordà, J.P.; Pujadas-Mora, J.M.; Cabré, A. Surnames and migrations: The Barcelona Area (1451-1900). Names and their Environment. Proceedings of the XXV International Congress of Onomastic Sciences, Glasgow, 25-29 August 2014. 3, pp. 131 - 143. 2016. ISBN 978-0-85261-947-6

Type of production: Book chapter

Format: Book

Relevant results: Catalan onomastics, and specifically the evolution of surnames, has been conditioned by several demographic, political and social processes that have imparted singular characteristics over the course of centuries. The combination of these factors resulted in a significant number of homonymic surnames, making it impossible to correctly identify their geographical origin based solely on linguistic criteria. As a possible solution to this, this paper proposes the use of the cluster analysis method to introduce a further criterion for their identification and classification. Historical registers of Marriage License Books from the Diocese of Barcelona are the source selected to achieve this goal. These records, which collect information on more than two million surnames, were maintained between 1451 and 1905 in a set of 291 books (Llibres d'Esposalles) kept at the archives of the Barcelona Cathedral.

DOI: <https://doi.org/10.1007/978-3-319-19884-2>

Type of production: Book chapter

Format: Book

Relevant results: This study presents a methodology for reconstructing the lifespan of individuals through a nominal record linkage procedure using historical marriage records of Barcelona from the 16th and 17th centuries. The data are extracted from the Barcelona Historical Marriage Database (BHMD), a very rich source that contains information about more than 600,000 unions celebrated in both urban and rural parishes of the Barcelona area over a period of almost 500 years (1451–1905). Also we discuss the main characteristics of the database, the standardization of the nominal information, the marriage linkage procedure, and the reconstruction of the lifespans. Finally, we present the preliminary results of an ongoing research project in which the reconstructed lifespans are used to estimate adult mortality using Bayesian methods.

- 53** Fornés, A.; Lladós, J.; Mas, J.; Pujadas-Mora, J.M.; Cabré, A. A bimodal crowdsourcing platform for demographic historical manuscripts. Digital Acces to Textual Culture Heritage 2014. pp. 103 - 108. DATeCH '14 Proceedings of the first international conference on digital access to textual cultural heritage, 2014. ISBN 978-1-4503-2588-2

DOI: 10.1145/2595188.2595199

Type of production: Book chapter

Format: Book

Relevant results: In this paper we present the crowdsourcing web-based application for the building of the Barcelona Historical Marriage Database in order to extract demographic information from the original source (document images). The proposed application integrates two points of view: the semantic information for demographic research, and the ground-truthing for document analysis research. Concretely, the application has the contents view, where the information is recorded into forms, and the labeling view, with the word labels for evaluating document analysis techniques. The crowdsourcing architecture allows to accelerate the information extraction (many users can work simultaneously), validate the information, and easily provide feedback to the users. We finally show how the proposed application can be extended to other kind of demographic historical manuscripts.

Exchange of scientific information between the sanitary professionals participating in the international sanitary conferences in the 19th century. The Circulation of Science and Technology: Proceedings of the 4th International Conference of the ESHS. Societat Catalana d'Història de la Ciència i la Tècnica - Institut d'Estudis Catalans, 2010. ISBN 978-84-9965-108-8

Type of production: Book chapter

Format: Book

Relevant results: The archive and the library of the Spanish physician Pere Felip Monlau (1808-1871) are located in the Balearic Library in Palma of Majorca. This archive contains all the correspondence exchanged between

Monlau, Spanish delegate in the three first International Sanitary Conferences, and the other delegates of the countries represented in the Conferences. The aim of the study is to explore the information related to the fight against epidemics, mainly cholera, contained in these letters in order to evaluate its influence in the conclusions of the International Sanitary Conferences. Analyzing the documentation of the Spanish delegate, it is seen that he had enough freedom when it came to expressing their opinions and defending their points of view. Nevertheless, the interests of the states were above the interests of public health

- 55** Pujadas-Mora, J.M.; Canaleta, E. La actuación de la Real Academia de Medicina y Cirugía de Palma de Mallorca ante el peligro epidémico. [The intervention of the Palma de Mallorca's Royal Academy of Medicine and Surgery in epidemic threat]. La ciudadela de los fantasmas: Lazaretos y protección sanitaria en el mundo moderno. pp. 49 - 63. (Spain): Institut d'Estudis Menorquins - Sociedad Española de Historia de la Medicina, 2010. ISBN 978-8-4957-1880-8

Type of production: Book chapter

Format: Book

Relevant results: The threat of cholera and yellow fever epidemic was constant in the nineteenth century. The aim of the study is to assess the role played by Palma de Mallorca's Royal Academy of Medicine and Surgery as a consultative and facultative body in hygienic and epidemic matters. The members of the Academy showed a regular confidence in sanitary cordons and quarantines either to apply preventive measures or to isolate the affected populations. Actually, they were pro Contagionism from the very beginning as it was mentioned in some of the annual academic reports and even when Contagionism was not so popular among Spanish physicians.

- 56** Canaleta, E.; Moll, I.; Pujadas-Mora, J.M.; Salas, P. De la inoculación a la vacuna: Mallorca de los siglos XVIII y XIX. [From inoculation to vaccination: Mallorca, 18th – 19th Centuries]. Las vacunas: historia y actualidad. pp. 37 - 52. (Spain): Institut d'Estudis Menorquins, 2008. ISBN 978-8-4957-1864-8

Type of production: Book chapter

Format: Book

Relevant results: The goal of the study is to describe the practice of inoculation and vaccination in Mallorca throughout the eighteenth and nineteenth centuries, such as the medical discourse generated around these prophylactic measures. Inoculation was the result of individual practices, like the beginning of vaccination. It was not until the mid-nineteenth century when vaccination became widespread by the Royal Academy of Medicine and latterly by the Balearic Vaccination Institute.

- 57** Pujadas-Mora, J.M. La producció científica d'Enric Fajarnés i Tur (1858 - 1934). [The scientific production of the physician Enric Fajarnés i Tur (1858-1934)]. Enric Fajarnés i Tur (1858 - 1934), entre la història i la demografia. 7, pp. 35 - 78. (Spain): Conselleria d'Economia, Hisenda i Innovació, 2008. ISBN 978-8-4968-4185-7

Type of production: Book chapter

Format: Book

Relevant results: Enric Fajarnés (1858 – 1934) studied Medicine but he didn't practice it for long time because he worked as high manager in the Spanish Post Service until his retirement. However, he did scientific research on the context of the hygienist movement during the final decades of the nineteenth century and the first half of the twentieth century. His contributions to the demography and epidemiology of the Balearic Islands, reflect many of the principles of Social Medicine and Public Health. He was a prolific author with over 1000 publications.

- 58** Pujadas-Mora, J.M.; Canaleta, E. La producció científica d'un metge que féu política: Emili Darder Cànaves (1895-1936). [The scientific production of a physician who did politics. Type of production: Book chapter

Format: Book

Relevant results: Emili Darder (1895 – 1936) was a physician that became member of the balear council and the mayor of the city of Palma. He boosted important public reforms based on the promotion of health, as improvements in public health conditions of populations: sewage, potable water supply, direct intervention in housing and modification of individual practices in daily habits and disease. He reorganized the municipal health services and improved the provincial charity infrastructures. His work ended abruptly due to his execution in 1936.

Type of production: Book chapter

Format: Book

Relevant results: Medical topographies were a genre of Hygienism literature to describe the social and environmental conditions of populations. The Medical Academy was in charge of the preparation of the topographies in Mallorca. Currently it has been preserved in 11 different municipalities. They were divided into two major sections: The first part had a clear Hippocratic inspiration with a physical description of the place: geographic location, climate, soil and hydrography. The second part was a description of the biological environment (flora and fauna) and also the nutrition and temperament of the inhabitants.

- 60** Canaleta, E; Pujadas-Mora, J.M. L'epidèmia de pesta de 1820 a Mallorca: la creació d'epidèmies invisibles als municipis de l'interior de l'illa. El cas de Binissalem i Alaró. [The epidemic of plague of 1820 in Mallorca: the creation of invisible epidemics]. Condicions de vida al món rural. pp. 343 - 363. (Spain): Institut d'Estudis Ilerdencs, 2006. ISBN 978-8-4899-4389-6

Type of production: Book chapter

Format: Book

Relevant results: Government response against the epidemic threats of the nineteenth century contributed to the reformulation of the public health structure together with new legal provisions to fight against epidemics. At certain times, the articulation of this response led to the creation of "invisible epidemics" as a result of the effectiveness of a wide range of health measures in order to avoid a disease outbreak as it was done in Binissalem and Alaró (two municipalities of Majorca, allocated in its center) in 1820 to fight against plague. These two villages adopted prophylactic measures based on isolation by land (inland cordons), among other measures of cleaning.

- 61** Pujadas-Mora, J.M. La gestión municipal de las epidemias de cólera en Palma (Mallorca) durante el siglo XIX: "epidemias invisibles". [Municipal management of the cholera epidemics in Palma (Mallorca), 19th century]. La ciudad contemporánea, espacio y sociedad. pp. 219 - 310. (Spain): Universidad del País Vasco, Servicio de Publicaciones, 2006. ISBN 978-8-4837-3765-1

Type of production: Book chapter

Format: Book

Relevant results: The outbreaks of cholera in Europe along 19th Century happened while plague had disappeared two centuries ago, though with some exceptions, and the smallpox was almost under control due to vaccination. The Spanish territory experienced four waves of cholera, being the first one documented in 1833, followed by the three subsequent waves in the periods 1840-1862, 1862-1875 and 1883-1890. The study aims to identify the municipal management as a response's mechanism to social problems as the risk of Cholera outbreaks in the city of Palma, capital of the Balearic Islands, along 19th century. In this manner, preventive actions from local and regional authorities are assessed through the creation of invisible epidemics applying measures of isolation, hygiene and assistance. This is a possible explanation of the fact that Palma was only affected by cholera in 1865. It must be highlighted the absolute watchfulness and well organization followed in the maritime sanitary cordons. This fact was likely one of the important reasons of the low incidence of epidemics in the Balearic Islands in the 19th Century.

- 62** Pujadas-Mora, J.M. La población de las Islas Baleares en el siglo XIX. [The population of Balearic Islands in the 19th century]. Historia de las Islas Baleares. Época Contemporánea. Siglo XIX. pp. 115 - 156. (Spain): El Mundo - El Día, 2006. ISBN 978-8-4954-7393-6

Type of production: Book chapter

Format: Book

Relevant results: Modernization process of European societies in the 19th and 20th Centuries is one of the most relevant characteristics of the contemporary world, especially evident in the demographic field, known as the Demographic Transition (an important change from high rates of mortality and fertility-nuptiality to low rates of both phenomena). The most evident consequence of this transition was the population growth. The study aims to describe the Demographic Transition of the Balearic Islands. Each one of its islands showed a different transition pattern, being Menorca the most advanced demographically speaking, followed by Mallorca and Ibiza-Formentera subsequently. Indeed, it can be seen a meaningful and earlier improvement in mortality in Menorca in comparison with Ibiza. The demographic profile of the island of Mallorca was highly dependent on the behavior of the city of Palma, showing a higher mortality than the other municipalities of the same island. Nevertheless, the relative position of the Balearic Islands in demographic terms in the Spanish ranking was excellent.

- 63** Pujadas-Mora, J.M. La població conventual a Mallorca entre el cens d'Aranda (1768) i la Desamortització de Mendizábal (1836). [The conventual population in Mallorca, 1768 – 1836]. Abadies, cartoixes, convents i monestirs: aspectes demogràfics, socioeconòmics i culturals de les comunitats religioses, segles XIII al XIX. pp. 206 - 224. (Spain): Institut d'Estudis Baleàrics, 2004. ISBN 978-8-4958-7606-5

Type of production: Book chapter

Format: Book

Relevant results: The study aims to analyze the demographic structure of the cloistered conventual population of Mallorca at the end of the Old Regime as a proxy of the social change which occurred to clergy as a consequence of Papal bull of Innocent XIII (1723) or the Spanish decrees of Charles III in 1771. Male and female population is analyzed independently, observing a major aging process among nuns. There were a decreasing number of both populations over time and it was observed a important concentration of religious population in the city of Palma. The main results pointed out that at the end of the 18th century the demographic model of the convents was outdated due to the old age of its population and the gap of renovation (really few novices). At the same time, a set of legal regulations, abovementioned, made its continuity more difficult based on numerous clausus. We must keep in mind that along 19th Century a new kind of convents was spread; these institutions were opened to citizens, as the convents of the Charity sisters which were throughout the whole Majorcan territory.

- 64** Pujadas-Mora, J.M; Salas-Vives, P. Les epidèmies a les Illes Balears (1800-2020) [The epidemics in the Balearic Islands (1800-2020). Les epidèmies a les Illes Balears (1800-2020) [The epidemics in the Balearic Islands (1800-2020). pp. 1 - 60. Documenta Balear, 2021. ISBN 978-84-18441-21-9

Type of production: Scientific book or monograph **Format:** Book

Relevant results: The aim of this book is to offer a synthetic approach to the main epidemics that have affected the Balearic Islands in contemporary times, between 1800 and 2020. It analyzes the spread and mortality, as well as the causes and consequences, with the understanding that all epidemics go beyond health and affect the economy, politics and society as a whole. Finally, knowledge of past epidemic outbreaks will allow us to assess more accurately the current epidemic caused by Covid-19.

- 65** Moll, I.; Salas, P.; Pujadas-Mora, J.M.; Canaleta, E. La lluita per la vida. Administració, medicina i reforma sanitària (Mallorca 1820-1923). [The struggle for life. Administration, medicine and health reforms (Mallorca, 1820 – 1923)]. La lluita per la vida. Administració, medicina i reforma sanitària (Mallorca 1820-1923). [The struggle for life. Administration, medicine and health reforms (Mallorca, 1820 – 1923)]. Mallorca, Balearic Islands(Spain): El Gall Editor, 2014. ISBN 978-84-942855-2-3

Type of production: Scientific book or monograph **Format:** Book

Relevant results: This book was originated with the goal to answer a seemingly simple question that hides a high complexity: Why the mortality of Majorca (and the whole Balearic Islands), from the second half of the nineteenth century onwards, was very similar to the advanced countries as well as significantly lower than the in rest of Spain? The aim of the book is the study of the decline of mortality in Majorca within the frame of the consolidation of the Liberal State and the so-called Demographic, Epidemiological and Health Transitions. The research shows how the municipal and provincial institutions developed new public health increasing the municipal medical staff, organizing vaccination campaigns and the improvement of urban cleaning The construction of new rural cemeteries, the walls demolition of Palma or the charitable measures to alleviate the pocket of misery are also part of these policies. However, the context changed since 1880s, with the emergence of the bacteriology. From this point onwards chemical disinfection was added to the cleaning policies, thanks to the use of chlorine and other substances, first from time to time and, by the early twentieth century, more systematically.

L'ensenyament de les ciències de la salut a les Illes Balears des de la Conquesta fins a la Guerra Civil. [The teaching of health sciences in the Balearic Islands from the Conquest to the Civil War (1229-1936)]. pp. 3 - 117. (Spain): Conselleria de Salut i Consum. Direcció General d'Avaluació i Acreditació. Govern de les Illes Balears, 2008. ISBN 978-8-4606-4749-2

Type of production: Scientific book or monograph **Format:** Book

Relevant results: This book was launched with the idea of being an overview of education's evolution of Health Sciences at the Balearic Islands, covering the clinical exercise, preventive medicine and public health from a historical perspective. It is presented in detail the institutions which provided health training at different points in time: kind of universities, the Estudi General Lul·lià, la Reial i Pontifícia Universitat Literària de Palma, or scientific associations which were frequent at the end of the 18th Century, the Acadèmia Mèdicopràctica de Mallorca, the Col·legi de Metges de les Illes Balears or the Reial Acadèmia de Medicina i Cirurgia, among others. It must be noticed that reading this book from a current perspective would confirm that the inhabitants of Mallorca had but still have the necessity to study Medicine abroad because this kind of studies are not offered by their own institutions.

- 67** Prats, E.; Pujadas-Mora, J.M. Enric Fajarnés i Tur (1858-1934), entre la història i la demografia. [Enric Fajarnés i Tur (1858-1934) From history to demography]. Mallorca(Spain): Conselleria d'Economia, Hisenda i Innovació, 2008. ISBN 978-8-4968-4185-7

Type of production: Scientific book or monograph **Format:** Book

Relevant results: This book presents the life and works of the Ibiza physician Enric Fajarnés i Tur as well as a facsimile edition of eleven of his salient studies. Three of them collect his research on the Ibiza island history and the others refer to demographic and epidemiological studies on the Balearic Islands, both contemporary to the author and historical. This book was published as part of the 75th anniversary of his death. Its presentation was part of the events of the so-called "Fajarnés Year". This commemoration also included a round table panel on this Ibiza figure at the Royal Academy of Medicine and Surgery of the Balearic Islands, from which Fajarnés was member holding several positions and with an exhibition which included his biography, his professional dedication –he was a public officer in the Spanish Post Office–, his historical research and his demographic and epidemiological work. It was held in Palma, Ibiza, Menorca and Barcelona.

Provable tasks: Research
- 4** **Entity:** Inter-University Consortium for Political and Social Research. University of Michigan
City of entity: Ann Arbor, United States of America
Start date: 23/06/2006 **Duration:** 1 month - 9 days
Goals of the stay: Doctorate
Provable tasks: Research
- 5** **Entity:** Center for Population Studies. University of Umeå (nowadays is called Centre for Demographic and Ageing Research (CEDAR))
City of entity: Umeå, Sweden
Start date: 03/09/2005 **Duration:** 5 months - 3 days
Goals of the stay: Doctorate
Provable tasks: Research
- 6** **Entity:** Cambridge Group for the History of Population and Social Structure. University of Cambridge
City of entity: Cambridge, United Kingdom
Start date: 01/06/2005 **Duration:** 3 months - 2 days
Goals of the stay: Doctorate
Provable tasks: Research
- 7** **Entity:** Centro de Estudios Demográficos
Type of entity: University Centres and Structures and Associated Bodies
City of entity: Bellaterra (Cerdanyola del Vallès), Catalonia, Spain
Start date: 01/06/2004 **Duration:** 2 months - 2 days
Goals of the stay: Doctorate
Provable tasks: Research

Other types of collaboration with researchers or technologists

- 1** **Type of relationship:** Research stay
Name principal investigator (PI, Co-PI....): Joaquín Trinca (Pontificia Universidad Católica, Chile)
Description of the collaboration: Joint project
Start date: 2020 **Duration:** 3 months
- 2** **Type of relationship:** Research stay
Name principal investigator (PI, Co-PI....): Silvia María Méndez Maín (Universidad Veracruzana - México)
Description of the collaboration: Joint project
Start date: 2019 **Duration:** 3 months
- 3** **Type of relationship:** Doctoral research stay
Name principal investigator (PI, Co-PI....): Begoña Candela (Universidad de Murcia)
Description of the collaboration: Supervision
Start date: 2018 **Duration:** 21 days
- 4** **Type of relationship:** Doctoral research stay
Name principal investigator (PI, Co-PI....): Víctor Antonio Luque de Haro (Universidad de Almería)
Description of the collaboration: Supervision
Start date: 2018 **Duration:** 1 month
- 5** **Type of relationship:** Doctoral research stay
Name principal investigator (PI, Co-PI....): Daniel Baldellou (Universidad de Zaragoza)
Description of the collaboration: Supervision
Start date: 2014 **Duration:** 1 month

Scientific societies and professional associations

- 1** **Affiliation entity:** Asociación de Demografía Histórica (ADEH)
City affiliation entity: Madrid, Spain
Professional category: Editorial board
Start-End date: 2010 - 2022
- 2** **Affiliation entity:** Asociación de Demografía Histórica (ADEH) **Type of entity:** Associations and Groups
City affiliation entity: Madrid, Spain
Professional category: President
Start date: 2023
- 3** **Affiliation entity:** Social Science History Association
City affiliation entity: United States of America
Professional category: Member
Start date: 2019
- 4** **Affiliation entity:** Asociación de Demografía Histórica (ADEH) **Type of entity:** Associations and Groups
City affiliation entity: Madrid, Spain

Professional category: General Secretary
Start date: 2017

- 5** **Name of the society:** European Social Science History Conference
Affiliation entity: European Social Science History **Type of entity:** Associations and Groups
City affiliation entity: Amsterdam, Holland
Professional category: Permanent convenor of Family and Demography Network
Start date: 2014
- 6** **Affiliation entity:** European Association for Population Studies (EAPS)
City affiliation entity: The Hague, Holland

Start date: 2010
- 7** **Affiliation entity:** International Union for the Scientific Study of Population (IUSSP)
City affiliation entity: Paris, France
Professional category: Member
Start date: 2009
- 8** **Affiliation entity:** Asociación de Demografía Histórica (ADEH)
City affiliation entity: Madrid, Spain
Professional category: Member
Start date: 2004

Editorial councils

- 1** **Name of the editorial council:** The History of the family
Start date: 2021
- 2** **Name of the editorial council:** Investigaciones de Historia Económica / Economic History Research, invited editor of the special issue 'Pandemics in History'
Affiliation entity: Asociación Española de Historia Económica **Type of entity:** Associations and Groups
Start date: 2020
- 3** **Name of the editorial council:** Revista de Demografía Histórica
Affiliation entity: Asociación de Demografía Histórica **Type of entity:** Associations and Groups
City affiliation entity: BarcelonaBarcelona, Spain
Tasks carried out: Co-editor of the scientific journal
Start date: 2019
- 4** **Name of the editorial council:** La Resclosa
Affiliation entity: Centre d'Estudis del Gaià **Type of entity:** Associations and Groups
City affiliation entity: Tarragona, Tarragona, Spain
Start date: 2018
- 5** **Name of the editorial council:** Revista de Demografía Histórica
Affiliation entity: Asociación de Demografía Histórica **Type of entity:** Associations and Groups

City affiliation entity: BarcelonaBarcelona, Spain

Tasks carried out: Member of the editorial board

Start date: 2014

Co-operation networks

- 1 Name of the network:** Women on the Move - WoMov
Identification of the network: Funding by European Cooperation in Science and Technology COST Project OC-2019-1-23859
Nº of researchers: 33
Participating entity/entities: 33 Universities and Researchs Centers
Tasks carried out: Leader of the working group "Sources, limits and Constraints", and member of the management committee meeting
Start date: 2020 **Duration:** 4 years
- 2 Name of the network:** Niveles de vida, salud, nutrición y desigualdad. Siglos XVIII-XXI [Levels of life, health, nutrition and inequality. XVIII-XXI centuries]
Identification of the network: Ministerio de Ciencia, Innovación y Universidades RED2018-102413-T (15.000 €)
Participating entity/entities: Universidad de Murcia **Type of entity:** University
Start date: 2019
- 3 Name of the network:** Time Machine project
Identification of the network: European Union's Horizon 2020 research and innovation programme under grant agreement No 820323.
Participating entity/entities: More than 14.000 institutions
Start date: 2019 **Duration:** 4 years
- 4 Name of the network:** International Network - Historical and osteoarchaeological Past Populations Explorations (INHOPPE)
Participating entity/entities: Institut National d'Études Démographiques **Type of entity:** University Centres and Structures and Associated Bodies
Start date: 2016
- 5 Name of the network:** SHIP Network: Causes of death in city ports
Participating entity/entities: Cambrigde Group for the History of Population and Social Structure; Ghent University; University of Copenhagen; University of Venice; University of Dusseldorf; Centre d'Estudis Demogràfics **Type of entity:** University; University; University; University; University; University Centres and Structures and Associated Bodies
Start date: 2016
- 6 Name of the network:** Document analysis and knowledge modelling for cultural heritage actions in the Pyrenees region
Participating entity/entities: Centre de Visió por Computador; Centre d'Estudis Demogràfics; Institut de Recherche en Informatique of Toulouse; Laboratoire Bordelais de Recherche en Informatique; School of Archival and Records Management **Type of entity:** ; University Centres and Structures and Associated Bodies; University Centres and Structures and Associated Bodies; University Centres and Structures and Associated Bodies; University Centres and Structures and Associated Bodies
Start date: 2015

- 7** **Name of the network:** Quarantine Studies Network
Participating entity/entities: University of Evora; Universitat de Girona; University of Malta; Universidad de las Islas Baleares; Centre National de la Recherche Scientifique
Start date: 20/12/2013

Type of entity: ; University; University; University; Public Research Body

Prizes, mentions and distinctions

- 1** **Description:** Louis Henry Award by the European Society of Historical Demography on recognizing methodological innovations in data collection, visualization or analysis of demographic data
Awarding entity: European Society Of Historical Demography
Conferral date: 04/03/2022
Type of entity: Associations and Groups
- 2** **Description:** Beca de Historia Local Miquel Carreras [The Miquel Carreras local history award]
Awarding entity: Archivo Histórico de Sabadell
City awarding entity: Sabadell, Catalonia, Spain
Conferral date: 05/06/2017
- 3** **Description:** Best poster award at the European Population Conference
Awarding entity: European Association for Population Studies (EAPS)
City awarding entity: La Haya, Holland
Conferral date: 16/06/2012
Type of entity: Associations and Groups
- 4** **Description:** Best scientific paper in Medical History
Awarding entity: Real Academia de Medicina de las Islas Baleares
City awarding entity: Palma, Balearic Islands, Spain
Conferral date: 15/02/2006
Type of entity: Healthcare Institutions

Periods of research activity

- 1** **Nº of recognized periods:** 2
Certifying entity: Agència per a la Qualitat del Sistema Universitari de Catalunya (AQU) [Catalan University Quality Assurance Agency, (AQU)]
City certifying entity: Barcelona, Spain
Date of recognition: 20/12/2021
Type of entity: State agency
- 2** **Nº of recognized periods:** 2
Geographical area: National
Certifying entity: Comisión Nacional Evaluadora de la Actividad Investigadora (CNEAI)
City certifying entity: Madrid, Spain
Date of recognition: 09/07/2021
Type of entity: State agency

Obtained accreditations/recognitions

- 1** **Description:** Acreditación Programa I3 (Incentivación de la Incorporación e Intensificación de la Actividad Investigadora)
Accrediting entity: Agencia Estatal de Investigación. Ministerio de Ciencia e Innovación)
City accrediting entity: Madrid, Spain
Date of recognition: 26/08/2020
- 2** **Description:** Acreditació de Recerca Professorat Lector [Lecturer]
Accrediting entity: Agència per a la Qualitat del Sistema Universitari a Catalunya (AQU) [Catalan University Quality Assurance Agency, (AQU)]
City accrediting entity: Barcelona, Catalonia, Spain
Date of recognition: 29/03/2019
- 3** **Description:** Acreditació de Recerca Professorat Agregat [Associate Professor]
Accrediting entity: Agència per a la Qualitat del Sistema Universitari a Catalunya (AQU) [Catalan University Quality Assurance Agency, (AQU)]
City accrediting entity: Barcelona, Catalonia, Spain
Date of recognition: 05/12/2018
- 4** **Description:** Acreditación para Profesor ayudante doctor [Assistant lecturer]
Accrediting entity: Agencia Nacional de Evaluación de la Calidad y Acreditación [National Agency for Quality Assessment and Accreditation of Spain, ANECA]
City accrediting entity: Madrid, Spain
Date of recognition: 22/12/2017
- 5** **Description:** Acreditación para Profesor contratado doctor [Contracted lecturer]
Accrediting entity: Agencia Nacional de Evaluación de la Calidad y Acreditación [National Agency for Quality Assessment and Accreditation of Spain, ANECA]
City accrediting entity: Madrid, Spain
Date of recognition: 22/12/2017
- 6** **Description:** Acreditación para Profesor de universidad privada [Private university lecturer]
Accrediting entity: Agencia Nacional de Evaluación de la Calidad y Acreditación [National Agency for Quality Assessment and Accreditation of Spain, ANECA]
City accrediting entity: Madrid, Spain
Date of recognition: 22/12/2017

Summary of other achievements

- 1** **Description of the achievement:** Curator of the exhibition on the physician Enric Fajarnés i Tur (1858-1934) titled: "Enric Fajarnés i Tur (1858-1934), between History and Demography" Palma (Balearic Islands): December, 15th - 31st, 2008; Eivissa (Balearic Islands): February, 2nd - March, 2nd 2009; Menorca (Balearic Islands): April, 12th- May, 12th, 2009; Barcelona: June, 4th- July, 4th, 2009
- 2** **Description of the achievement:** Member of doctoral committees (I have been nominated for 7 different committees)
