

Personal information**Professional Summary**

Throughout my career, I have had the privilege of meeting exceptional mentors and working with values such as integrity, ethics, respect for others, knowledge sharing, initiative, and a strong results orientation. I have honed my communication and public speaking skills by developing case studies and organizing and moderating national and international workshops and conferences. I have been honored to support the development of strategies and projects for major national and international organizations and institutions.

I am a passionate advocate for sustainability, with over 25 years of experience in sustainable products, buildings, and the built environment. I have been involved in defining sustainability protocols and related third-party certification processes.

My experience in Italy and abroad has allowed me to build a solid network of relationships, take on various consultancy and entrepreneurial roles, through which I have developed a wide range of distinctive skills. During my professional career I have been able to teach what I learned at various national and international universities and institutions
