Gian Marco Selleri

Ingegnere Di Progettazione at <u>Protesa S.p.A.</u>

Gian Marco Selleri is an experienced automation engineer currently working at Protesa S.p.A. since November 2020, where roles include Ingegnere di progettazione and Ingegnere automazione. Responsibilities involve the study of automated systems, programming command and regulation systems, integrating software with machinery, customizing software using Python, and experimentation with high-performance GPUs. Prior experience includes an internship at SACMI from September 2019 to February 2020, focusing on a thesis project related to developing an industrial line parametric editor in virtual reality using Autodesk Vred. Gian Marco holds a Master's degree in Automation Engineering and a Bachelor's degree in Automation Engineering from Alma Mater Studiorum – Università di Bologna, along with a scientific diploma from Liceo Scientifico Statale "G. Bruno."
