REP. 4940 PROT. 131070 del 17/06/2019

## THE DIRECTOR

**WITH REFERENCE TO** the rules referred to in Article 14 of the present call for application

## ORDERS

### Art. 1 – Purpose

A procedure of comparative evaluation by qualifications and public discussion is called for the recruitment of 2 researchers with a fixed-term employment contract full-time for the three-year - pursuant to art. 24 paragraph 3 letter a) (junior) of Law no. 240/2010 -. Sector competition reference 06/D3 - Blood Diseases, Oncology and Rheumatology, Scientific sector MED/15 - Blood Diseases. The jobs are activated for the needs of research and study of the Department of Experimental, Diagnostic and Specialty Medicine - DIMES. Serving primarily at the same Department in Bologna. The contract shall last three years. An annual gross total amount equal to € 34.898,00. The annual increase in this amount will be calculated according to the existing procedure for non-contracted personnel.

### Art. 2 – Activities to be performed

Each contract includes 350 hours of supplementary teaching and assistance to students, for each academic year covered by the contract. The contract shall schedule 30 hours of teaching on annual basis.

The researchers will perform medical care services at the hospital facility of AOSP S. ORSOLA - U.O. Ematologia, in line with the methods defined by the hospital for all contracted university research staff.

In this regard Articles 5 and 6 of Italian Legislative Decree 517/99 and amendments apply, as well as regional laws and local agreements.

The medical activity will be related to the research projects described in this call for applications. Concerning the provisions of art. 10 regarding fixed term researchers, issued by Rectoral Decree no. 344 of 29/03/2011 and amendments, the researcher's activities must be linked to the development of the 2 project:

-Project 1: "Therapy of acute lymphoblastic leukemia".

The project is based on the integration between clinical diagnosis and therapy of adult patients with acute lymphoblastic leukemia and translational research. In detail, Phase I-II-III clinical trials, for patients with newly diagnosed or relapse / refractory disease will be conducted, based on the administration of innovative molecules, in monotherapy or in polychemotherapy program. Clinical and laboratory monitoring will be performed, with attention to prospective assessments of minimal residual disease and its impact on the therapeutic pathway of these patients, and those treated outside experimental protocols. The efficacy and safety of the aforementioned new drugs will be analyzed in terms of survival, rates of responses and incidence of adverse events. Moreover, genomic analyzes will be performed, at the time of diagnosis, of relapse and disease progression, on bone marrow and peripheral blood samples, aimed at identifying potential mechanisms of resistance to new molecules

Objective of the research project: during the period of appointment the investigator must be the author of at least 4 manuscripts published on peer reviewed international journals and must participate to at least 5 national or international scientific meetings in the field of research pertaining to the project.

-Project 2: "Targeted therapy and minimal residual disease in acute myeloid leukemia".

The research project Targeted therapy and minimal residual disease in Acute Myeloid Leukemia is an integrated clinical-laboratory study aimed to optimize a molecularly targeted therapy in Acute Myeloid Leukemia. The approach will be based on the recognition of novel or already known genetic lesions and the global therapeutic strategy will include minimal residual disease detection and treatment. Clinical and laboratory activity will be direct to Acute Myeloid Leukemia patients during different phases of the disease: at the diagnosis, when a detailed cytogenetic-molecular characterization will be performed, aimed to identify possible therapeutic targets; at consolidation, when treatment response will be assessed in terms of minimal residual disease, and based on this the therapeutic strategy will be revised; at relapse/refractoriness, when mechanisms of resistance to conventional or experimental therapies carried out will be studied, to identify new alternative therapeutic targets.

Objective of the research project: during the period of appointment the investigator must be the author of at least 4 manuscripts published on peer reviewed international journals and must participate to at least 5 national or international scientific meetings in the field of research pertaining to the project.

### **Art. 3 - Admission requirements**

The selection is open to applicants, even citizens of countries not belonging to the European Union, in possession of the title of:

- High School of Specialization in Ematology or equivalent qualification obtained in Italy or abroad, as well as the authorization to practice surgical doctor in Italy.
