EUMentorSTEM

ERASMUS +

The conference is organized within the framework of the Erasmus Plus project "EUMentorSTEM - Creation of a European e-platform of MENTORing and coaching for promoting migrant women in Science, Technology, Engineering and Mathematics, financed by the European Commission Erasmus+ Strategic Partnership for Adult Education.

Purpose

The conference aims at providing a unique venue for academic and practice-policy oriented debate, drawing on the presentation of the project's results. The conference aims at advancing theoretical development, empirical knowledge and practice about highly-skilled migrant women in the knowledge-based economy, with a specific focus on those women working in male-dominated sectors (e.g., STEM).

We present academic, policy- and practice-oriented contributions taking different disciplinary views on the topic, so as to increase the variety of disciplines and perspectives represented in the conference and to stimulate dialogue.
