

AI, robots and the future of human relationships: are we crossing a threshold?

May 6, from 9:00 am
to 1:00 pm

Cesena Campus - Room 2.12 - ground floor,
entrance via Machiavelli (level 2)

The workshop will be led by Prof. James E. Katz, Feld Professor of Emerging Media Studies at Boston University, an internationally renowned scholar on AI, emerging media, and human-computer interaction.

Scientific Focus

The sociological and psychological implications of interaction with AI companions and social robots
The transition from functional technologies to social presences
The paradox between digital connection and isolation
Ethical and policy issues related to the replacement or integration of human relationships
Transformations in recruitment processes and work in companies
