Co-leadership of WP6 on model simulations in present and future scenario.

2021-current [I-CHANGE](#): Individual Change of HAbits Needed for Green European transition. H2020 Innovation Action in support of the European Green Deal faces the challenge of engaging and promoting the active participation of citizens for addressing climate change, sustainable development and environmental protection in the framework of the European Green Deal , the European Climate Pact and the European Biodiversity Strategy for 2030. The overall driving concept is that citizens and civil society have a central role in the definition of environmental protection and climate action and their direct involvement is essential to drive a true shift and promotion of changes of behaviors towards more sustainable patterns. Co-Leadership of WP3 “Enhancing monitoring opportunities through citizen science”, which aims to organize a series of citizen science initiatives to raise awareness on climate action and to motivate the engagement of citizen scientists by improving the observation of the environment and environmental impacts.
