WORK EXPERIENCE

may 2023 – in progress

Studio Paci Beta Soc. Cons A R.l. - Ingegneria e Architettura – Pesaro (PU)

Designer

- I work within a team that deals with carrying out competitions and tenders in the area National and to collaborate with internationally renowned studios. among which:
 - Winners of the tender for the awarding of services for the definitive and executive design of the renovation works of the **Mazzolari Mosca building, Pesaro (PU)**. The proposal was the subject of in-depth research on the restoration and rehabilitation of the building, on the structural and conservative improvement, on the adaptation of the systems and on the restoration of frescoed surfaces.
 - Winners of the tender for design and engineering services for the definitive and executive design with reservation of works management and safety coordination relating to the structural restoration, consolidation, finishing and systems works of the **Auditorium of Sant' Agostino – San Ginesio (MC)**. The proposal also involved in-depth research on the investigations to be carried out on the building to detect the severity of the post-earthquake damage.
 - Winners of the tender for design and engineering services for the technical and economic, definitive and executive feasibility design, safety coordination in the design phase with reservation of the works management and safety coordination in the execution phase relating to the works damage repair and seismic improvement of the former headquarters of the **Municipality of San Ginesio (MC)**. The proposal also involved in-depth research on structural interventions.
 - Winners of the tender to win technical engineering and architectural services relating to the technical-economic feasibility design, executive design and CSP, with reservation of assignment for the works management and CSE services, relating to the intervention called "**Ex Chiesa di San Francesco: ristrutturazione, miglioramento sismico, recupero architettonico e funzionale e sede Comunale via Roma: demolizione e ricostruzione, recupero e riqualificazione architettonica dello "Scalone del Panfilì"**.
 - Winners of the European tender with an open telematic procedure for the assignment of engineering and architectural services relating to the technical and economic feasibility design, including safety coordination during the design phase, subject to the assignment of works management and safety coordination during the execution phase, relating to the construction of the **new hospital complex in the Muraglia area in Pesaro**. The research to develop the proposal was carried out with a Multidisciplinary Team from all over Italy.
- I use several programs including: Autocad, Rhinoceros 3D, Sketchup, Enscape, InDesign, Photoshop, Revit, Lumion, Enscape
