University of Bologna

Department of
Architecture

University of Bologna
Viale Risorgimento n.2
Bologna, Italy

Giorgia Predari is a building engineer-architect and she is PhD in Building Engineering-Architecture. She is an Associate Professor, and she deals with research in the Architectural Engineering sector (ICAR /10), particularly in the history of construction, heritage at risk, performance rehabilitation in the seismic field and sustainability in construction.

Academic Roles

Currently, she is the Director of the Bachelor's degree in Architecture-Engineering and of the Master's degree in Building Engineering-Architecture.

She is Deputy Coordinator and member of the council of the PhD Programme Architecture and Design Cultures of the University of Bologna.

She is a member of the Scientific Committee of the Engineering and Architecture Library of the University of Bologna, member of the Access Test and Transfer Request Evaluation Commission (incoming mobility).

She is a member of the Evaluation Commissions of the final exam for the Degree course in Building Engineering and Architecture at the University of Bologna; internal member of the judging commission for the awarding of the title of PhD.

Teaching Activity

Since the academic year 2011 - 2012 she has continuously carried out teaching activities in the courses of study of Building Engineering - Architecture and Civil Engineering at the University of Bologna, with the roles of Professor, adjunct Professor and teaching tutor.

- 2022 – present: Associate Professor of Architectural Technology I and Historical Construction Techniques for the Bachelor's Degree in Architecture-Engineering; Building Restoration and Conservation, Single cycle degree programs in Building Engineering-Architecture; Building Renovation for the Master's degree programs in Building Engineering-Architecture; University of Bologna, School of Engineering and Architecture;

- 2020 - 2022: Senior assistant professor of Architectural Technology I and Building Restoration and Conservation, Single cycle degree programs in Architecture and Building Engineering, University of Bologna, School of Engineering and Architecture;

- 2017 - 2019: Adjunct professor, Architectural Technology, Bachelor's degree in Civil Engineering, University of Bologna, School of Engineering and Architecture.

- 2015 – 2019: Teaching assistance, Building Restoration and Conservation (Prof. Riccardo Gulli), Single cycle degree programs (LMCU) in Architecture and Building Engineering, University of Bologna, School of Engineering and Architecture.

- 2013 – 2015: Lecturer in the II level Master "The sustainable project: building renovation and urban regeneration", University of Bologna, School of Engineering and Architecture.

- 07/2012 – 08/2012: Participating teacher at the "CHESS 2012 – European Summer School on Construction History" on the theme "The Birth of Modern Engineering", Vrije Universiteit Brussel (VUB), Université Libre de Bruxelles (ULB), Belgium;

- 2011 – 2015: Adjunct professor, Architectural Technology II, Single cycle degree programs (LMCU) in Architecture and Building Engineering, University of Bologna, School of Engineering and Architecture.

Research Activity

Since 2011, she has continuously carried out research activities, at first at the Interdepartmental Center for Industrial Research (C.I.R.I.) Building and Construction, which is part of the research network and innovation structures in the Emilia Romagna Region, dedicated to industrial research and technological transfer, then at the Department of Architecture of the University of Bologna.

The main research interests concern the study of the evolution and diffusion of modern building techniques, with the analysis of exemplary buildings concerning their construction and design era, with the aim of highlighting the link between the characteristics of modern Italian construction, the local technological possibilities and the architectural language. A consequence of this kind of studies is the interest in the conservation practices of modern Italian architecture, to protect and enhance the national built heritage.

The researcher's activities also include the study of the evolution and diffusion of traditional construction techniques, with the analysis of the technological features of the historical construction to identify the evolution of the built heritage.

Participation in Research Projects

She is the Scientific Head for the Department of Architecture of the REBUILD project, ERASMUS-EDU-2024-CB-VET.

She is a member of the research group of many international projects, as European project Pro-GET-onE (Proactive synergy of integrated efficient technologies on building's envelopes), DRIVE 0 (Driving decarbonization of the EU building stock by enhancing a consumer-centred and locally based circular renovation process) included in the HORIZON 2020 program; Herit4ages (User-centric and data-driven retrofitting solutions for a resilient, energy-efficient, low-emission and inclusive cultural heritage), Re-Value (Re-Valuing Urban Quality & Climate Neutrality in European Waterfront Cities), CrAFT (Creating actionable futures: Making climate-neutral cities inclusive, beautiful and sustainable) included in the HORIZON EUROPE program; BUILD2050 (Training for Sustainable and Healthy Building for 2050) and EDUCA4ALL included in the Erasmus+ program.

- 2025 - present: *ERASMUS-EDU-2024-CB-VET, REBUILD*. The Rebuild Project aims to improve and deepen VET vocational training by transferring knowledge from EU countries to non-Erasmus+ countries, located in the Neighbourhood East, on the topic of sustainable building reconstruction following extreme catastrophic events such as war or natural disasters.
- 2023 - present: *Horizon Europe, Herit4ages, User-centric and data-driven retrofitting solutions for a resilient, energy-efficient, low-emission and inclusive cultural heritage*. HERIT4AGES is a major European innovation action project. The main objective is to develop and validate a set of technical and socially innovative sustainable energy and resource-efficient solutions for the cost-effective improvement and preservation of cultural heritage buildings. The resilience of cultural built environments must offer similar opportunities to new buildings, e.g., offer good comfort and a healthy environment for users while being affordable and accessible. They must also be connected to IoT functionalities and help achieve EU and global decarbonisation targets.
- 2023 - present, *Horizon Europe: Re-Value, Re-Valuing Urban Quality & Climate Neutrality in European Waterfront Cities*: 9 European waterfront cities (Ålesund, Bruges, Burgas, Rimini, Cascais, Constanta, Izmir, Písek, and Rijeka) test how to create value through urban quality, in a holistic approach towards climate neutrality. Supported by this approach, the 9 Re-Value Cities will fine-tune, share and test a Portfolio of Urban Design and Planning Methods optimally deployed to achieve climate neutrality and significantly reduce GHG emissions by 2030.
- 2023 – present, *Horizon Europe: CrAFT, Creating actionable futures: Making climate-neutral cities inclusive, beautiful and sustainable*. The CrAFT project will

place the transition to climate neutrality at the heart of urban stakeholders, supporting the Mission Board on Climate-Neutral and Smart Cities and the H2020 LC-GD-1-2-2020 one-stop platform in designing and deploying Climate City Contracts, based on experience-based knowledge from CrAFT's 3 Sandbox Cities (Bologna, Prague and Amsterdam) and 70 Reference Cities engaged in testing and sharing knowledge together with cultural, artistic and creative sectors, property owners and tenants, and citizens and communities.

- 2022 – present: *Partecipation in the Erasmus+ Project: Training for Sustainable and Healthy Building for 2050 (BUILD2050)*. The main objective of BUILD2050 is to contribute to improving the construction, renovation and operation of healthy and sustainable buildings at the European level through the development of integrated and transnational training.
- 2020 – 2023: *INTERREG V-B Adriatic-Ionian ADRION Programme 2014-2020, ADRISEISMIC, New approaches for seismic improvement and renovation of Adriatic and Ionian historic urban centers*. The Adriatic-Ionian area is heavily undermined by earthquakes. Each country has developed laws and norms, methods, techniques and expertise for tackling earthquake risks and for reducing seismic vulnerability of the built environment. Nevertheless, in urban areas and particularly in historical centers they remain high. ADRISEISMIC overall objective is to exchange and systematize knowledge and practices in tackling the reduction of the seismic vulnerability of the built environment in PP countries, to harmonize planning and management of emergencies after seismic events and the post-earthquake phase, in order to drastically improve the approaches for dealing with and to secure the reduction of seismic vulnerability among ADRION regions. The main focus areas are the historical urban centers and historical squares and their surrounding buildings, conceived as symbol of local identity and socio-economic cores for the ADRION settlements.
- 2017 – 2023. *Participation in the European funded project Pro-GET-onE - GA No 723747*. (Coordinator: Prof. A. Ferrante), Department of Architecture, Alma Mater Studiorum University of Bologna. The activity is focused on the participation in the coordination of the project and the collaboration in the development of external steel structures aimed at increasing the overall resistant capacity of reinforced concrete buildings.
- 2015 – 2018: *Research fellow at the Department of Architecture of Bologna* for the “Caratterizzazione tipologico-costruttiva e riqualificazione funzionale dell'ex cinema Modernissimo, Palazzo Ronzani, Bologna” (Typological and constructive characterization and functional requalification of the Modernissimo cinema, Palazzo Ronzani, Bologna), supervisor: Prof. Riccardo Gulli.
- 2014 – 2015: *Research fellow at the Centro Interdipartimentale di Ricerca Industriale (C.I.R.I.) – Edilizia e Costruzioni, Unità Operativa Tecnologie innovative applicate al restauro, recupero e riqualificazione del patrimonio costruito – Formazione e restauro dei materiali* (Interdepartmental Center for Industrial Research (C.I.R.I.) - Building and Construction) for “Protocolli di valutazione speditiva della qualità del patrimonio edilizio esistente” (Protocols for the rapid evaluation of the quality of the existing buildings), supervisor: Prof. Riccardo Gulli.
- 2011 – 2014: *Research fellow at the C.I.R.I. – Building and Construction*, for “Materiali e sistemi costruttivi innovativi negli interventi di restauro e recupero del patrimonio costruito in ambito sismico” (Innovative materials and construction systems in the restoration of built heritage in seismic areas), supervisor: Prof. Riccardo Gulli.
- 2010: *Participation in the project “Prin 2007 – Materiali, procedimenti costruttivi e progetti innovativi per la sostenibilità e la compatibilità ambientale nel territorio della Regione Emilia - Romagna”* (Prin 2007 – Materials, construction procedures and innovative projects for sustainability and environmental compatibility in Emilia-Romagna)

- 2017 – 2019. Editorial assistant of the Journal "TEMA: Technologies, Engineering, Materials and Architecture", ISSN 2421-4574
- Speaker at national and international conferences

Education

- 2008 - 2011. Ph.D. in Architecture and Building Engineering, University of Bologna, School of Engineering and Architecture, Supervisor: Prof. Giovanni Mochi; Thesis Title: "L'attività pionieristica della Scuola bolognese nello studio e nell'utilizzo del cemento armato: 1875 – 1924. Tecniche costruttive e tipologie architettoniche" (The pioneering activity of the School of Engineering of Bologna in the theory and practice of reinforced concrete: 1875 - 1924. Construction techniques and architectural typologies).
- 1998 - 2007. Single cycle degree (Combined Bachelor and Master) in Architecture and Building Engineering, final grade 110/110, University of Bologna, Faculty of Engineering, supervisor: Prof. Giovanni Mochi; Thesis Title: "Tecnologia laterizia nell'edilizia di base. Il caso del centro storico di Medicina" (Brick technology in existing buildings. The case of the historical centre of Medicina)
- 1993 – 1997. High school Diploma, scientific high school A.B. Sabin, Bologna
- Languages: Italian (mother tongue), English, Spanish.
