

CURRICULUM VITAE – LISA BRANCHINI – July 2018

PERSONAL DATA

Date of birth: 12/08/1984

Place of birth: San Giovanni in Persiceto (BO), Italy

Phone: + 39 338 1955206

Office-phone: + 39 0512093314

E-mail: lisa.branchini2@unibo.it

EDUCATION AND PROFESSIONAL CAREER

10/2003-10/2006

Bachelor in Energy and Nuclear Engineering “cum laude”, Alma Mater Studiorum - University of Bologna

10/2006-10/2008

Master in Energy and Nuclear Engineering “cum laude”, Alma Mater Studiorum - University of Bologna

01/2011-07/2011

Visiting Ph.D. Scholar at the Penn State University, State College, PA, USA, under the advisory of Emeritus Prof. Horacio Perez-Blanco, Department of Mechanical and Nuclear Engineering. *Main research topic related to the dynamic modelling of gas turbine and the integration with renewable energy sources.*

01/2009-12/2012

Ph.D. in Mechanical Engineering, Alma Mater Studiorum - University of Bologna. *PhD dissertation: Advanced Waste-to-Energy Cycles*

01/2013-06/2018

Postdoctoral fellow, Department of Industrial Engineering, Alma Mater Studiorum - University of Bologna.

03/2017-to date

National **habilitation to be Associate Professor** for the discipline 09/C1 – Fluid machines and energy systems for energy and environment - at the Scientific Habilitation Concourse (ASN) del Ministero dell'Istruzione, dell'Università e della Ricerca (MIUR),

Call D.D. 1532/2016.

06/2018-to date

Assistant Professor (Academic discipline: ING-IND/08 Fluid Machinery) at the Department of Industrial Engineering (DIN), group of Fluid Machines and Energy systems, University of Bologna.

SCIENTIFIC LEADERSHIP PROFILE

LB scientific activity is focused on the thermodynamics of advanced and innovative energy systems, advanced gas turbines, CHP and micro-CHP systems, renewable based and waste heat recovery technologies. She is currently working as Assistant Professor at the Fluid Machines and Energy Systems group of DIN, where she carries out both numerical and experimental research activities. She is one of the coordinator of the “Laboratory of Technologies for Micro-CoGeneration” developed in the framework of the CIRI-EA, financed by POR-FESR 2014-2020. Within this lab, research is currently carried out by implementing test benches and developing numerical and experimental studies on micro-generators, with special reference to the Organic Rankine Cycle technology.

PhD ACTIVITIES, SUMMARY

- Set-up of a research collaboration with HERA- power plant division (a leader multi-utility company in Italy) on novel approaches to maximize the conversion of municipal solid waste into energy.
- Design and modelling the integration between Waste-To-Energy and gas turbine power plants.
- Propose and investigate two basic types of hybrid dual-fuel combined cycle arrangements: (i) steam/water side integration and (ii) windbox repowering.
- Thermodynamic investigation on optimal WTE-GT plant match in order to maximize steam generation, power output and minimize GT discharge outlet temperature.
- Discuss the issue of power output allocation and conversion efficiency for a multi-fuel integrated system. Define several performance indexes to quantify the performance of a multi-fuel integrated system.
- Design and modelling the repowering of existing WTE power plant with GT units.

PhD Internship at the Penn State University main topics:

- Gas turbines dynamic modelling in order to account for start-up/shut-down and ramp rate limitations.
- Modelling the integration between GT units and renewable energy sources in order to smooth out non-programmable renewables variabilities.
- Assess the feasibility to integrate GTs and wind in order to provide firm power to the grid: GTs operational constrains included in the model of the integrated system in order to correctly demonstrate how the renewable variability stresses the turbine performance.

POSTDOCTORAL ACTIVITIES, SUMMARY

- technologies and processes for the recovery of energy from waste and residues
- production of electricity and cogeneration from biomass and non-conventional fuels
- gas turbines and combined cycles
- coproduction of synthetic fuels and electricity
- technologies, processes and strategies to mitigate the greenhouse effect
- simulation and optimization of cogeneration systems, with and without district heating
- Optimization of the generators set and the grid management in a poli-generation grid
- design and optimization of small scale plug and play process for the generation of liquefied natural gas (LNG)

HONORS AND AWARDS

- Awarded in 2015 with the “**John P. Davis Award**” by the ASME, for a study on gas turbine, selected among 1051 papers of that year, “*in recognition of the technical paper that most significantly describes new or continuing gas turbine applications; identifies planning, installation, operating and/or maintenance problems and their solutions; and exemplifies candid exposure of real-world problems and solutions and is judged, therefore, to be of exceptional value to others supplying or using gas turbines and their support systems*”.
- Winner of the “**Best Paper Award**”, form the Industrial and Cogeneration Committee of the ASME-IGTI, for a papers presented at the ASME Turbo Expo 2015.
- Selected in 2015 as “Pioneer” for the European project CLIMATE-KIC Pioneers Into Practice Program.

- Winner in 2014 of the “**Green Energy Startup**” by Aster - the Consortium for innovation and technology transfer of Emilia-Romagna- for regional projects of enterprise in the sector of the renewable energies.
- Awarded in 2012 with the “**Young Engineer Travel Award**” by the ASME, for a study on gas turbine integrated with renewable non programmable sources.
- Awarded in 2012 with the “**Best PhD Thesis**” by the University of Ferrara, Italy.

INDICATORS OF ESTEEM/EDITORIAL ACTIVITIES

- Since 2017 **Co-Guest Editor** for “Applied-Science (ISSN 2076-3417) - Special Issue: Simulation, Analysis, Optimization and New Challenges of District Heating and Cooling Networks”;
- **Referee** for various international Journals, mainly: Applied Energy; Energy; Energy Conversion and Management; Applied Thermal Engineering; International Journal of Hydrogen Energy, Energies; Entropy; Journal of Power Sources;
- **Member of the ASME** (American Society of Mechanical Engineers) and member of the ASME committees “Industrial and Cogeneration” and “Oil and Gas applications”;

CONFERENCES ORGANIZATION

- Since 2012, Chair and Co-chair of the “Industrial and cogeneration Committee”;
- Member of the Local Organizing Committee and of the Scientific secretariat of the 68th National Congress Italian thermo-technical Association - ATI, 2013.
- Organizer and speaker of the tutorial of basics: “New frontiers and challenges in polygeneration grids”, Turbo expo 2018, June 11-15, 2018, Lillestrøm (Oslo), Norway.

PUBLICATION SUMMARY

- As for July 2018: **13 articles** in peer-reviewed international journals; **37 publications** in international conference proceedings; **17 publications** in national conference proceedings; **H-Index = 10** (source Scopus), **11** (Google Scholar).

- **Author of a monograph** titled “Waste-to-Energy.- Advanced Cycles and New Design Concepts for Efficient Power Plants”, Springer International Publishing, 2015, eBook ISBN: 978-3-319-13608-0, doi: 10.1007/978-3-319-13608-0, Hardcover ISBN:978-3-319-13607-3, Softcover ISBN: 978-3-319-35246-6.

INTERNATIONAL CONFERENCES ATTENDANCE

List limited to conferences with oral presentations:

- **ASME-ATI-UIT 2010** – Conference on Thermal and Environmental Issues in Energy Systems – May 16–19, 2010, Sorrento, Italy;
- **ASME Turbo Expo 2010** – Turbine Technical Conference and Exposition – June 14–18, 2010, Glasgow, Scotland;
- **ASME Turbo Expo 2011** – Turbine Technical Conference and Exposition – June 6–10, 2011, Vancouver, Canada;
- **ASME Turbo Expo 2012** – Turbine Technical Conference and Exposition – June 11–15, 2012, Copenhagen, Denmark;
- **ICAE 2013** - Fifth International Conference on Applied Energy– July 1–4, 2013, Pretoria, South Africa;
- **ICAE 2014** - Sixth International Conference on Applied Energy– May 30 – June 2, 2014, Taipei, Taiwan;
- **ASME Turbo Expo 2014** – Turbine Technical Conference and Exposition – June 16–20, 2014, Düsseldorf, Germany;
- **ASME Turbo Expo 2015** – Turbine Technical Conference and Exposition – June 15–19, 2015, Montreal, Canada;
- **ASME Turbo Expo 2017** – Turbine Technical Conference and Exposition – June 26–30, 2017, Charlotte, NC, USA;
- **ORC2017** - International Seminar on ORC Power Systems, 13-15 September 2017, Milano, Italy;
- **ASME Turbo Expo 2018**– Turbine Technical Conference and Exposition – June 11–15, 2018, Lillestrøm (Oslo), Norway.

TEACHING AND MENTORING EXPERIENCE

- **Courses:** since 2016 professor of “Energy systems” a MS course at the University of Bologna. In 2014 professor of “Advanced Energy Systems and Cogeneration” a MS course at the University of Bologna.
- **Mentoring:** co-advisor of 22 master students and 4 under-graduate students; assisted the supervision of 1 PhD.
- From 2011 to 2014 **Tutor** of the 2nd level Professional Master's Programme of the University of Bologna in collaboration with ENI/Tecnomare “Design of Oil&Gas power plants”

PARTICIPATION IN FUNDED RESEARCH PROJECTS

Most relevant projects

- Coordinator of the “Laboratory of Technologies for Micro-CoGeneration” developed in the framework of the CIRI-EA, financed by **POR-FESR 2014-2020 Topic**: small scale and low-grade heat resources and sustainable energy conversion technologies.
- Responsible of a scientific collaboration, since 2013, between University of Bologna (DIN) and **TURBODEN** company (Mitsubishi Heavy Industries group), on the topic of ORC application to natural gas compression stations.
- Participant in the scientific collaboration between University of Bologna (CIRI-EA) and **GRAF** company (oil and gas division), on the topic of fluid machines for cryogenic applications, in the framework of POR-FESR 2014-2020 regional project.
- Participant in the Project “**CLEANPORT** – Study and design of LNG systems on board of ships” 2016-2018 funded by POR-FESR 2014-2020 regional project.
- Participant in the Project “**EFFICITY** – Efficient energy systems for smart urban districts” 2017-2018 funded by POR-FESR 2014-2020 regional project.
- Participant in the Project “**FRIMAG** – Development of a refrigerator prototype for food storage” 2017-2018 funded by POR-FESR 2014-2020 regional project.
- Participant in the scientific collaboration between University of Bologna (DIN) and **ENEA** on the topic of “startegies for optimal load allocation in a poli-generation grid”, in the framework of Ricerca di Sistema, AdP MiSE-CNR, PAR 2015.
- Participant in the scientific collaboration between University of Bologna (DIN) and **ENEA** on the topic of “Design of smart energy districts”, in the framework of Ricerca di Sistema, AdP MiSE-CNR, PAR 2013-14.

- Participant in the industrial research project "Pilot program for the experimental test of hydrogen technologies to mitigate the greenhouse effect", in the framework of an Agreement between University of Bologna and **Ravenna municipality**, 2011-2012.
- Participant in the scientific collaboration between University of Bologna (DIN) and **CNR** (ITAE) on the topic of "Thermal integration of a SOFC power generator and a Na-NiCl₂ battery for CHP domestic application" in the framework of Ricerca di Sistema, AdP MSE-CNR, PAR 2009-10.
- Participant in the scientific collaboration between University of Bologna (DIN) and **CNR** (ITAE) on the topic of "Design and analysis of complex generation system for domestic utilities", in the framework of Ricerca di Sistema, AdP MSE-CNR, PAR 2008.
- Participant in National Research Project **PRIN 2008** prot. 2008X733PJ_002 (Principal investigator Prof. G Bidini, University of Perugia), on the topic of "biogas derived syngas combustion in micro-turbines".
- Participant in the industrial research project with **Nova Somor S.r.l.** on the topic "Thermodynamic analysis and modelling of an hydraulic piston pump fed by low grade heat sources".
- Participant in the industrial research project with **ENI** on the topic "Solutions for improving the energy efficiency of the natural gas compressor station of Casalborsetti", project FAM-ENI 2016-17.
- Participant in the industrial research project with **PowerCrop (Maccaferri Group)** on the topic "Design, off-design and dynamic analysis of the integrated power plant of Macchiareddu" 2014-15.
- Participant in the industrial research project with **HERA S.p.A - Divisione Ingegneria Grandi Impianti** "Combining waste-to-energy steam cycle with gas turbine units", project FAM-HERA 2010-13.

ADDITIONAL INFO

- From 09/2015 to 02/2016 period of compulsory maternity leave.
