<b>Education and training</b>	
Dates	January 2009 – May 2012
Title of qualification awarded	Ph.D.
Principal subjects / occupational skills covered	Theories, formalisms and applications for opening up Semantic Publishing to an effective interaction between scholarly documents (e.g., journal articles) and their related semantic and formal descriptions. In fact, the main aim of my work is to increase the users' comprehension of documents and to allow document enrichment, discovery and linkage to document-related resources and contexts, such as other articles and raw scientific data.  Particular relevance is given to languages for handling overlapping markup and formal markup semantics, ontologies for Semantic Publishing, and interfaces for improving the interaction with ontologies (especially for the following topics: ontology understanding, ontology sense-making, ontology documentation and ontology authoring tools).
